NOTICE INVITING BIDS

Notice is hereby given that sealed bids will be received at the office of the Chief Engineer of the Los Angeles County Flood Control District, Room 106, 2250 Alcazar Street, Los Angeles, California (mailing address, Terminal Annex, P.O. Box 2418, Los Angeles 54, California), up to 11:00 a.m., Friday, September 7, 1962 and will then be publicly opened and read in Room 111 at the above address for the CONSTRUCTION OF 1958 STORM DRAIN BOND ISSUE PROJECT NO. 584, WALTERIA LAKE, IN THE CITIES OF TORRANCE AND LOS ANGELES, CALIFORNIA.

The work to be performed under this contract is covered by four alternate proposals and consists of a storm drain and force main system, a pump station with appurtenant facilities and retention basin structures all of which are common to all proposals and temporary pumping facilities which are different for each proposal as follows:

Storm Drain and Force Main

The work to be performed under this portion of the contract consists essentially of approximately 1,675 linear feet of reinforced concrete pipe main line and connector pipe varying in size from 36 inches to 15 inches in diameter; approximately 1,160 linear feet of 30-inch reinforced concrete pressure pipe; approximately 64 linear feet of welded steel pipe force main; approximately 90 linear feet of 24-inch corrugated metal pipe, 12 gage; and appurtenant work including, but not limited to, manholes, transition structures, junction structures, catch basins, and corrugated metal inlet structures and fittings.

Pump Station and Appurtenant Work

The work to be performed under this portion of the contract involves the construction of a reinforced concrete pumping station completely equipped, ready for operation, including utilities for pump station, and the performance of all appurtenant work.

The pump station consists mainly of the following structures and equipment: 36' x 65' reinforced concrete pump building; three 6,750 gallons per minute, 98 feet total dynamic head vertical mixed flow pumps; one 4,500 gallons per minute, 98 feet total dynamic head vertical mixed flow pump; one 400 gallon per minute, 94 feet total dynamic head vertical turbine type pump; one 50 gallon per minute, 12 feet total dynamic head vertical gallery pump with motor; three 250 B.H.P. natural gas engines, with right angle gear drives; one 150 H.P. and one 25 H.P. vertical hollow shaft polyphase electric motors; bridge crane, hoist; related mechanical equipment, electrical equipment, fabricated metal work, piping, instruments and accessories.

The appurtenant work consists of drilling and casing pump and electrode wells with asbestos cement pipe; construction of a venturi meter system and vault, and the construction of a telemeter system.

Retention Basin Structures and Appurtenant Work

The work to be performed under this portion of the contract involves the construction of: reinforced concrete box conduit and rectangular channel inlets, consisting of approximately 12,828 cubic yards of excavations, 1,450 cubic yards of concrete, 141,900 pounds of reinforcing steel, and 2,175 barrels of portland cement; a reinforced concrete arch intake tunnel consisting of approximately 1,146 cubic yards of excavation; 645 cubic yards of concrete, 25,951 pounds of reinforcing steel, and 968 barrels of portland cement; two reinforced concrete confluence structures, a reinforced concrete intake structure with steel trash racks; approximately 970 tons of quarry stone to be placed around confluence structures; approximately 3,710 tons of grouted quarry stone to be placed along walls of reinforced concrete channel inlets; approximately 4,605 linear feet of reinforced concrete retaining walls around top of basin; approximately 4,900 linear feet of chain link fencing (which quantity includes therein some salvaged existing fencing to be utilized by Contractor); a structural steel equipment ramp with concrete pile footings; remove and salvage existing improvements in retention basin involving salvaging and repositioning of approximately 2,140 tons of quarry stone existing in temporary structures in the retention basin; grade ditches around top of retention basin; and other appurtenant work.

Proposal 1 involves all of the above described Storm Drain and Force Main, Pump Station and Appurtenant Work, Retention Basin Structures and Appurtenant Work, and Temporary Pumping Facilities, Gasoline Engine Driven.

Proposal 2 involves all of the above described Storm Drain and Force Main, Pump Station and Appurtenant Work, Retention Basin Structures and Appurtenant Work, and Temporary Pumping Facilities, Liquified Petroleum Gas Engine Driven.

Proposal 3 involves all of the above described Storm Drain and Force Main, Pump Station and Appurtenant Work, Retention Basin Structures and Appurtenant Work, and Temporary Pumping Facilities, Diesel Engine Driven.

Proposal 4 involves all of the above described Storm Drain and Force Main, Pump Station and Appurtenant Work, Retention Basin Structures and Appurtenant Work, and Temporary Pumping Facilities, Electric Motor Driven.

Bids may be submitted on any or all proposals.

Each bid must be accompanied by a certified or cashier's check or bidder's bond in an amount equal to ten (10) percent of the amount of the bid, payable to Los Angeles County Flood Control District as a guarantee that the bidder will, if awarded the contract, enter into a satisfactory agreement within fifteen (15) days after the date of the award and furnish a bond in the amount of at least fifty (50) percent of the amount of the accepted bid for the faithful performance of the work in accordance with the contract and specifications therefor and a bond in the amount of fifty (50) percent of the accepted bid to guarantee the payment of the materialmen and laborers. Each bid must be made on the proposal blanks prepared by the District. The bidder's bond must be duly executed by the bidder and a financially sound surety company authorized to transact business in this state and whose name is on file with the County Clerk of Los Angeles County as an approved and financially sound surety company.

The right is reserved to reject any or all bids not suited, in the judgment of the Board of Supervisors, to the best interests of the District.

Further information will be furnished and sets consisting of proposal blanks, drawings, and copies of the specifications may be obtained at the office of the Chief Engineer of Los Angeles County Flood Control District, Room 116, 2250 Alcazar Street, Los Angeles, California, upon payment as follows:

If drawings and specifications are picked up at the District's offices, the purchase price is $2.60 for each set which must be paid at the time the set is picked up. A mail address must be left with the District at that time which the prospective bidder agrees is sufficient to reach him. Please note that upon payment of the appropriate purchase price the drawings and specifications become the property of the purchaser and are not to be returned to the District for refund.

If drawings and specifications are requested by mail the purchase price is $3.64 for each set and the request must be accompanied by a check or money order in full payment for the number of sets desired. A return address must be furnished with such request which the sender thereby agrees is sufficient to reach him. Please note that upon payment of the appropriate purchase price the drawings and specifications become the property of the purchaser and are not to be returned to the District for refund.

The above prices include sales tax.

PREVAILING WAGE RATES

The Board of Supervisors of Los Angeles County Flood Control District has ascertained the prevailing rate of per diem wages in dollars, based on a working day of eight hours, for each craft or type of workman or mechanic needed to execute any construction contract which may be awarded by the Los Angeles County Flood Control District, to be as follows and as detailed below.

Except as otherwise specifically provided for painter classifications, the rates of per diem wages for each of the various classifications of work shall be the hereinafter set forth prevailing rates of hourly wages plus the hourly equivalent of any employer payments for health and welfare, pension, vacation and similar purposes multiplied by eight. Eight hours shall constitute a day's work; it being understood that in the event that workmen are employed less than eight hours per day, their per diem wages shall be determined to be that fraction of the per diem wages herein established that the number of hours of employment bears to eight hours.

APPRENTICES— May be employed in conformity with Sections 1777.5 and 1777.6 of the California Labor Code. ***

RIGGERS— Same wage scale as craft to which rigging is incidental.

WELDERS— Same wage scale as craft to which welding is incidental.

FOREMEN— All foremen not herein separately classified shall be paid not less than 25c per hour more than the hourly equivalent of the daily rate of the highest classification in which he has supervision in the six Basic Trades.
