. JUST WHAT IS A FERTILIZER?

Webster's Collegiate Dictionary de

Fertile—Producing fruit or vegeta-

bles in abundance.

Fertility—Quality of being fertile.

Fertilize—To make fertile, to fecundate or impregnate.

Fecundate—To make fruitful or prolific.

Manure—To enrich with a fertilizer; any matter which makes land productive; a fertilizing substance.

The Universal Dictionary defines; Fertilizer—Any material used as a manure for the land.

Manure—Any fertilizing substance used for enriching the soil.

Therefore, ORGANIC D. M. S. & B. LIME, containing CALCIUM, CARBONATE, SULPHUR, POTASH and PHOSPHORIC ACID is a Super-Lime Fertilizer.

A plat of ground is sadly in need of lime when it fails to produce a good crop of common red clover, or when the clover crop contains patches of sorrel.

Moneta, Cal., May 13, 1921.

Mr. Lee B. Hawkins,
Moneta, Calif.

Dear Sir:

Dear Sir:

Having purchased several tons of the D. M. S. & B. LIME of you in the carly winter, you no doubt remember I was to let you know the results as soon as noticeable. We placed a portion of the lime around each fig tree and worked it into the soil. Am glad to say we see a wonderful improvement. The trees have never had such beautiful dark green, glossy foliage, and the leaves are large and well developed. We are sure that the lime has made our soil much easier to work. At present everything points to a bumper crop of fruit.

I certainly recommend the use of D. M. S. LIME in orchard, field and garden.

Yours very truly, (Signed) M. E. LARGE, Grower of Fancy Figs

Gentlemen:
I have recensuse of

Gentlemen:

I have recently had occasion for the use of a fertilizer to put life in the soil on my property on St. Andrews Place, and giving the subject considerable thought in the selection of a suitable fertilizer, I came to the conclusion to try DECOMPOSED MARINE SHELL AND BONE LIME.

After two weeks from the time of application I was convinced that I had made no mistake. The growth and color that resulted far surpassed my expectations, and, therefore I take great pleasure in giving a testimonial as to its value to one in need of soil rejuvenating. Place, and giving the subject considerable thought in the selection of a suitable fertilizer, I came to the conclusion to try DECOMPOSED MARINE SHELL AND BONE LIME.

After two weeks from the time of application I was convinced that I had made no mistake. The growth and color that resulted far surpassed my expectations, and, therefore I take great pleasure in giving a testimonial as to its value to one in need of soil rejuvenating.

A visit to the above address will convince the most skeptical, as our soil, I claim, is the most unproductive in this neck of the woods.

Most sincerely, (Signed) J. W. A. OFF.

Have you tried D. M. S. & B. Lime Home Brew? It keeps the Home Fires Burning. It contains life-giving constituents — Calcium, Phosphoric Acid, Sulphur, Potassium. What you put in the soil reverts to the body.

The way to meet your troubles is to face it. Use D. M. S. & B. Lime and your troubles fade like a mist beneath the rising sun.

San Francisco, Cal.

Dear Sir: In reply to your letter of
June 4th, I have used the D. M. S.
Lime on my orange grove. Last
spring I put on an application of six
tons to the acre. My orchard consists of adobe soil. The application
of lime loosened up the soil and made
the fertilizer that I had been applying
available. My trees have increased in
production and are in a much morehealthy condition than before I put
it on. I believe a heavier application,
say ten tons per acre, would be better
on heavy soil. My next application
will be about that amount. Hoping
this information will be of some value
to you, I remain, Yours truly,
K. E. WATSON.

California Lime & FertilizerCo.,
Los Angeles, Calif.
Gentlemen:
Three months ago I bought some
D. M. S. & B. lime from you, which
I had heard from my neighbors was
a good fertilizer, for the purpose of
putting it on sweet potato plants,
which I have grown all my life, and
while you have not asked me for a
letter, I am so well pleased with the
results that I cannot help but want
you to know that I have grown more
and better plants in less time than
ever before. It has loosened up my
heavy adobe where my sweet potato
plants are so I can pull my plants very
easily by hand.
Coming from Alabama, I believe I
know what sweet potatoes are.
Yours truly,
(Signed) W. A. GILLIAM.

Size, quality and price of your crop is fully determined by the fertility of your soil.

Dear Sir:
In response to your request for my opinion of D. M. S. & B. Lime Fertilizer, will say that the Lime speaks for itself, mere words of opinion being unnecessary. It was indeed a surprise to see the amount of fruit gathered difference in the productivity of previous years, due entirely to the benefits of your "Available" lime fertilizer.
Trusting that this word of commendation may rescue someone from the sea of doubt, I will always be

Mr. Lee B. Hawkins, Moneta, Calif.

Moneta, Calif.

Dear Sir:

Some time ago I bought of you 800 lbs, of that famous Torrance Lime. At that time you said it was going to be higher in price. I would like to know if it has gone up and how much. Have been talking Torrance Lime to my neighbors and have got them interested and think that they will want some of it.

I want to get at least 1000 lbs. of it next month, as I know that it is a fine thing for trees and plants.

Let me hear from you as soon, as possible as to the price at your warehouse.

Very truly yours,

Very truly yours, A. G. HARPER.

1768 East Vernon Ave., Los Angeles, Cal.
