TORRANCE NEWS

Mr. and Mrs. J. B. Blankenship of Woodland, Cal., arrived the first of the week to visit their relatives, Mr. and Mrs. I. G. Anderson. They have disposed of their business in Woodland and are looking for a location in Southern California.

Mr. Willis Hiding of Philadelphia was a guest Sunday evening of Mr. and Mrs. Fred Lessing.

Mr. and Mrs. L. C. Schaefer of Pasadena were Sunday dinner guests of Mr. and Mrs. H. M. Tolson. In the afternoon they motored to Pasadena and attended the performance at the Raymond Theatre in the evening.

ROSES SUITABLE FOR HOME LAWNS

Native Species Are Most Suitable for the Yard and for Border Planting.

THE PRUNING IS IMPORTANT

Different Treatments Required Where Blossoms Are to Be Produced for Different Purposes—Heavy Manuring Essential.

Advice as to the varieties of roses best suited to a particular region is best obtained from the nearest grower or nurseryman. A different type of rose is needed for each of the various purposes for which roses are used. Those which are suitable for lawns or borders will not give satisfactory cut flowers; special kinds are best for arbors or trellises and other ornamental purposes. In the opinion of the United States Department of Agriculture, roses are not very satisfactory for hedges, as most types are

The Hybrid Tea Rose.

neither sufficiently compact nor sufficiently branched to make a really good hedge.

Native species, and those least modified by man's crossing and selection are most suitable for lawn and border planting. Border roses should have little pruning, the removal of the dead wood and the cutting of the whole bush to the ground every five to eight years being the best way of handling most varieties.

Climbing roses used for arbors and trellises may be managed either to give an abundance of bloom or to produce shade, but they cannot do both satisfactorily, and they are not well adapted to the production of shade as many other plants. Climbing roses should be pruned just after blooming by having the wood of the previous year's growth removed.

Cut-flower roses need clean culture, severe pruning and special care; therefore they should be planted by themselves in secluded beds and should not be used to beautify the grounds in place of the roses appropriate for lawns and borders. Cut-flower roses should be cut each spring to within six inches or one foot of the ground for finest blooms, or one-third to one-half the wood should be left if the object is a large quantity of blooms.

The essentials for satisfactory rose-growing are a well-drained retentive soil, thoroughly enriched, preferably with rotted manure. Cut-flower roses particularly need heavy annual manuring. Special care must be exercised to prevent the roots from drying when out of the ground for transplanting. Dormant roses should have from one-half to two-thirds of the wood removed at the time of transplanting. Watchfulness is the price of success with roses.

MAKE GARDEN PERMANENT

With Little Attention Hardy Plants Will Produce Crops That May Be Depended Upon.

A bed of asparagus is known to have given continuous service for more than 30 years, and asparagus is one of the first of the spring vegetables. A row of blackberries along a garden fence has produced abundant crops for 12 successive years. A few hills of rhubarb have provided a delicious sauce and helped with the making of pie season after season, with very little cost or attention. Strawberries require more care, but they furnish the first ripe fruit in the spring, and a very small plot of ground in one corner of the garden will supply the family, says the United States Department of Agriculture.

WATCH FOR PLANT LICE

If you would be sure of getting a crop of egg-plants, cucumbers, cantaloupes, as well as other garden vegetables, watch for plant lice. A nicotine spray will get them, but don't wait until the under sides of the leaves are covered before you begin the treatment.

MISSOURIANS PICNIC

All who ever lived in Missouri are invited to meet for the great annual picnic reunion all day Saturday, March 11, 1922, in Sycamore Grove Park, Los Angeles. Come as early as you can and spend the day with friends. We will have county registers and headquarters so you can find the old neighbors even with ten thousand present. There will be a brief program opening about two o'clock, but the main purpose will be to have a good time. The president, Dr. E. W. Ames, will preside. We want

to see all the tourists and visitors from the old home state as well as our residents, so as to make this the greatest picnic in our history. Bring your baskets well filled and share with friends. Coffee will be served free to all who buy the souvenir badges. Each one who learns of this picnic is asked to pass on the word. Further information may be had of C. H. Parsons, secretary of the Federation of State Societies, Continental National Bank, 901 South Main street, Los Angeles. Phone 10261, or of the pres Main 963.

BUICK

EVERYBODY KNOWS VALVE-IN-HEAD MEANS BUICK

More Facts You Should Know!

For the Calendar Year, January 1, 1921, to January 1, 1922, Buick built and actually sold over 80,000 Automobiles.

These Sales for the Calendar Year 1921 exceeded by over 12,000 cars the sales of any automobile manufacturer having a six-cylinder automobile in its line.

These Sales for this period likewise represent a volume of business greater by over \$9,000,000 than the sales of any other automobile manufacturer excluding Ford.

These figures are taken from official reports and are absolutely reliable.

FIRST-CLASS SERVICE OF ALL MAKES OF BATTERIES

We are especially proud of our repair department, where all mechanical overhauling and repairing, carburetion and ignition is in charge of some of the best repair men and mechanics in the south part of California. We stand back of our work. In this connection we also have a large tow car that is on the job night and day. Just ask us and we will be there when you are in trouble.
