A storage battery is made of lead

A storage battery is made of lead total capital or new construction expenditures for the year 1921 amounted to \$14,223,692.94. The principal

the report shows that \$14,372,900 pay." worth of stock was sold to the gen-

Three plant with 42,900 horsepower, and additional unit in Big Creek teries. Number Two power house of 21,400 horsepower, and a new development TWENTY-FIVE NEW HOUSES TO known as Big Creek Number Eight of 30,200 horsepower. This latter plant was placed in operation three months after the first concrete had been oured.

In order to keep pace with the growing demands for power ,the report states, a new power house is beng started, known as Big Creek Number Three. The ultimate capacity of this plant will be 200,000 horsepower, consisting of six units of 33,-300 horsepower each. The first unit will be put in operation in May, 1923, the second unit in July, and a third unit in February, 1924. The other units will be added as the demands for power require. These units will be the largest of their kind on the Edison system, resulting in greater economy of operation.

To transmit this power to the markets of Southern California and Central California, the voltage on the by this corporation. Big Creek transmission line will be ncreased from \$60,000 volts to 220,000 that high voltage of the Edison sysvolts, doubling the capacity of the tem. The raising of the voltage in

101-J-11

## The Cost of the Lowest Bid

NOWHERE does false economy exact such heavy penalties from the inexperienced as it does in the employment of electrical contracting service.

The difference in the bid of the qualified, responsible electrical contractor and the irresponsible is usually only about one-half of one per cent (\$50.00 on a \$10,000.00 house)

And the householder who thinks the difference worth saving will eventually spend five times as much in repairing faulty materials and workmanship or in-stalling additional outlets whose omission made the lower bid possible.

Cut rate contracting service is never economical. You can depend on the Qualified Contractor.
