# H. N. GRIFFIN

DEALER

Phone 1181

GARDENA, CAL.

756 PALM AVE.

#### To the Motor Public:

Having recently taken over the Buick agency for the territory covered by Torrance, Hawthorne, Lawndale, Inglewood, El Segundo, Gardena, and intervening communities, I wish to say that construction of the most up-to-date garage and salesrooms will soon be under way in Gardena, and am arranging to establish branches in Inglewood and possibly Torrance. In these establishments I will carry a complete line of Buick parts and accessories and only the best Buick mechanics will be employed.

Hoping to receive the patronage of the residents of these districts, and assuring them of my intention to uphold the reputation of the Buick and co-operate in the up-building of the community, I remain,

Sincerely Yours,

H. N. GRIFFIN.

## STATEWIDE LIQUOR WAR IS PLANNED

According to reports a general shake-up is expected in the Federal prohibition department, which will result in a liquor war of unprecedented magnitude in this state.

Reports of the pending shake-up were received from authentic sources in circles close to the prohibition headquarters in San Francisco and Los Angeles. Advice is that Samuel F. Rutter, state prohibition director, is to be transferred to another field, probably in Washington, where he will act in an important capacity directly under Commissioner Haynes.

Harold H. Doley, in charge of the Southern California enforcement bureau, is slated to succeed Rutter as state director. These changes are expected to result in a number of minor changes in the personnel of the field agent.

Rutter, who has had many years' service in governmental departments, will be in a position to assume responsible executive work, by reason of his long experience in actual field conditions.

It is not known who will take Doley's place here, but it was stated that it would be some outside man who is familiar with the liquor conditions of Southern California.

#### O. E. S. BOOTH

The Eastern Star Booth has already proven to be a magnet for the hungry and since early this morning have been serving their delicacies. Everything is home-made and delicious.

## Industrial Tent Like Homes

A display in the industrial tent that is of the greatest interest to mechanics and those working in machinery is that of the "Cedal" Mechanics Soap company, located on the north side of the tent.

Here is shown and demonstrated the effectiveness of a sawdust cleaner antiseptic soap whose merits are well recognized by those whose work brings them in contact with grease or oil and who find difficulty in removing it from their hands and bodies. The instantaneous effect of a handful of this dust-like powder is wonderful and the display will probably result in a large sale of the commodity in this community where it is needed by the mechanics in the factories.

Johnson, Carvell & Murphy, merchandise brokers of Los Angeles, certainly paid Torrance and its residents a compliment when they arranged their double booth display of the many well known brands of merchandise that they handle.

Chief among the latter are the line of Borden goods, including their milk, cream and chocolate malted milk; Baker's Cocoa and chocolate; the well known H. O. (Hornsby's Oatmeal); Mazola for salads and cooking; and the famous Karo syrup.

Among the most attractive displays and one of the earliest to be completed is that of the Torrance Plumbing company, whose space, occupying two connected booths, is filled with everything in the plumbing and heating line to delight the heart of the housekeeper.

Tastefully arranged and in such a manner that it resembles closely a well appointed home is shown a white-enamelled bath tub, wash stand, of the well known Thomas

Maddox Sons make, while alongside is the popular "Magic Way" unit heater and a Thermos Storage automatic water heater.

Directly in front of the main display is one of the automatic water heaters cut in-two, to show the wonderfully arranged interior. Mr. Parks, the proprietor of the Torrance Plumbing company, is in attendance at the booth most of the time and is busy showing to prospective builders the merits of his display.

Confining their display largely to statistical signs that are readily understood by the visitor to the fair the Wilmington Chamber of Commerce booth is attracting a great deal of attention from the fact that these signs show an astonishing growth—a growth so great that though the information was but recently gathered, the figures have had to be changed since the signs were painted. This is particularly noticeable in the figures covering the building permits, the sign showing that for the first seven months of 1922 the building permits aggregated \$809,500 and that since July 1 this has been increased to over \$1,000,000. The display is in charge of the secretary of the Wilmington chamber, who was a busy man yesterday explaining the various industries of Wilmington to the hundreds of visitors who gathered about the booth. In addition to the statistics showing that Wilmington covered an area of 12 square miles; had fifty important steamship lines radiating therefrom and claimed 5000 inhabitants, the booth contained a splendid display of canned tuna "the chicken of the sea" and several well arranged cases of canned sardines, that represented one of the leading industries of the city.

One is almost tempted to move to Gardena Valley if for no other reason than the raising of such

## Free Fish Friday To Red Haired Girls

"Free Fish Friday to Red-Haired Girls" is the sign that is conspicuously displayed over the Redondo Beach Chamber of Commerce booth by the Coast Fishing company. That it has attracted merited attention is shown by the fact that the request to have auburn-haired ladies register is being promptly complied with and already scores of titian haired beauties are in line for a fish dinner. Oil drilling machinery of the most interesting kind is another feature of this exhibit, the latter being the product of the Regan Forge & Engineering company of the beach city.

chickens as are shown at the Gardena Valley Chamber of Commerce booth at the fair. Prominently displayed over the coop containing a cock and several hens is the tempting sign, "You could have these too, if you lived in Gardena." Italian squash, immense tomatoes and other vegetables and a splendid display from the Spanish-American Institute printing department is included in the chamber's exhibit.

The "Hub City of Los Angeles County" as the residents of Compton term themselves, have a splendid display in their chamber of commerce booth consisting of made and unfinished Samson automobile tires, one of the leading industries of that flourishing community.

#### Her Move Next.

A love-smitten youth who was studying the approved methods of proposal asked one of his bachelor friends if he thought that a young man should propose to a girl on his knees.

"If he doesn't," replied his friend, "the girl should get off."
