A COMPLIMENT FOR YOU

A stranger who recently had occasion to spend several days here told us just before departing for his home that one thing which impressed him during his stay here was the number of latch-strings that were hanging out. He was from a big city, where one hardly knows his next-door neighbor, and it was pleasing to him to be where people spoke to him whether they knew him or not, and where they appeared to have time to answer his questions and to treat him courteously.

That is a mighty nice compliment for the town, but it also proves that there is still another good reason for making your home in a place this size. You bump right into neighborly help and courtesy at every turn. You find people who are more interested in life than in seeing how many dollars they can pile up. You feel that community spirit which the smaller towns of this country possess but which the large cities brag so much about. The gentleman was impressed with the fact that our people had time to answer his questions, and seemed pleased to be of assistance. He is carrying that same report wherever he goes, and such reports never do a town any harm.

If making and hoarding money is your prime object in life, then you belong, possibly, in the large city. But if you want to feel that you are cared for by your fellowmen; if you want to feel the real community spirit and know what it is to have real neighbors and neighbors you can depend on, then our advice is to stay right here, where the latchstrings are hanging out any where people have time to be polite to strangers.

STOCK CLUBS

Everyone in this community will be interested in knowing that splendid progress in live stock feeding contests, poultry raising and bee raising clubs, is being made. Recently in Lomita there was formed such clubs through the schools and it is probable that similar activities will be taken up in Torrance by the school authorities or those interested in Farm Bureau work.

The department of agriculture is interested in these clubs and reports that in seven states last year there were 1186 of them, with a total membership of 28,490. Of this number 12,786 made reports, showing that 731,907 eggs were set. From these 510,478 chickens were hatched. The value of the products sold was set at \$94,791.32, while the value of the stock on hand was estimated at \$382,777.37. A total of 712 exhibitions were held with 5,615 competitors, participating. The prize money divided among the winners amounted to \$9,681.14.

The department urges farmers throughout the United States to lend every encouragement to the boys and girls, and to assist them in forming live stock and poultry clubs whenever possible. They are the ones who will be running the country in a few years, and there is nothing more important than in planting in their minds now the dignity and opportunities offered to intelligent men and women in agriculture.

Any one interested in promoting this work in this community will find plenty of help, advice and encouragement if they care to write the Department of Agriculture at Washington and ask for it.

No greater service could be performed by the Farm Bureau of Lomita than to take up matters of this kind.

VERMONT AVE. BOOSTERS

A meeting of those interested in Vermont Avenue was held in the school house on Manchester Ave. last Friday evening and was largely attended. Two hundred or more were present to hear the speakers enumerate the advantages of this fine boulevard when opened to the public. City Engineer Bockhold was present and addressed the meeting. S. O. Barnes, president of the Gardena Chamber of Commerce also was called upon and explained the advantages the road would be as the new proposed boulevard, without a right angle turn, was the proper and only place where Vermont Avenue should be extended. Harbor City, Gardena, Torrance and then-On-The-Hill were represented.

THE PETROL OF PROGRESS IS "PEP"

Why Many Towns With a Future Fail To Realize Their Anticipation

There is little danger of this town ever succumbing to that dread disease of industrial life, lack of "pep." Our citizens, taken lack of "pep." Our citizens, taken boosters banner into the stronghold of the doubters, could they be found in sufficient numbers to form a stronghold, but there are some, few we admit, but some never-the-less, who shelter the naughty little hook-worm within their bosom and it is these, we hope, will read and profit by this.

The average citizen of the average town is alive to his own interests and anything having immediate bearing upon it, but few realize the immense value of the organized efforts of all and their effects upon his interests. He may take care of the garden and give the lawn its Sunday afternoon shave, and the pride of home may extend to the vicinity in which he lives, but there his responsibility ends. When it comes to some question of municipal interest "only too many are prone to sit in the evening glow of the incandescent at home and let "George" attend the meeting. Perhaps George is feeling the pulse of the studios through the medium of the camera and himself, be indisposed. The result of the meeting is liable to fall darned flat, and who is to blame? We, all of us, want to see our home city grow and we should be willing to serve the town to our utmost. It will pay, even if some copies of "Captain Billies Whiz-Bang" go un-read—pay in good sound coin of the realm.

We want to get together more, get acquainted, go out and meet our neighbors, who just moved in to that new house on the corner and give him a welcome and incidentally find out how he likes our town. He may have just arrived from a "dead" town or he might have come from a "live" town. It does not matter, he is judging his new town by the nice things he has seen and the treatment he has been accorded; and he may have an idea or two crammed away in his head that is worth while.

There are lots of new people constantly coming to town. Let's all get out and meet them. The results will be wonderful.

A WORD TO BOYS

Don't think, boys, that the so-called "has-been" you refer to when you pass him on the streets can't teach you a lot of things you don't know. Your more modern ways are something, of course, but his years of experience have taught him many things you won't know unless he gives you the information. If you really want to add to your efficiency you will spend some time talking with the older men, and getting their advice, instead of referring to them as "has-beens" and laboring under the thought that they no longer know anything worth while about life.

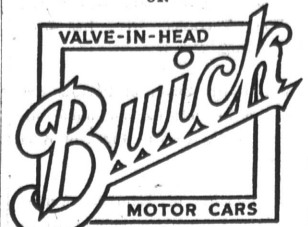

Older men may tell you some things which would be impractical under present-day ways of doing things, but they will also tell you other things which would be much to your advantage to know. You think you are stronger, more progressive and more aggressive, and you believe you are going to be a big success in your line. But when you reach the age of our older citizens you may not be able to hold as good a job as some of them are still holding. Once their prospects were no better than yours are now. You do not know, you have no way of knowing, what circumstances may work against you, any more than you know what mental suffering older men passed through on life's journey. So it would not be a bad idea to have a talk with them, young man, every time you have an opportunity. They may be able to save you from some of the pitfalls in the business and social world which they encountered. Experience is the best teacher. And it was in the school of experience that the older men of this community got their education.
