This is done, primarily, to impress upon the lot purchasers one of the many benefits to be derived from co-operation, and to stimulate the lot selling campaign.

Preparations are being made at this time to hold meetings in Redondo, and explain in detail the method under which the promoter and founder of Hammerton is working.

Detail plans are being carefully worked out for starting some of the many industries that will soon be under operations, by Mr. Hammerton. Mr. Bartlett is devoting all his time to the Community Building Company interests.

Just at press time, Mr. Hammerton telephoned the "Enterprise" that Mr. G. E. Townsend had tendered his resignation as Sales Agent for the Hammerton Tract, which took effect at once.

EXCURSIONS BRING 92

Ninety-two people was the total of those who came in on the excursions conducted by M. L. May, for the Dominguez Land Corporation, Wednesday. An average of six a visit this week.

BUYS LOT AND BUILDS

Christ Dobrick is building a five-room bungalow on his lot recently purchased of the Dominguez Land Corporation on the corner of Carson and Anapola streets. Frank Sammons has the contract.

Sixteenth street, Vista Highlands, Torrance, is the scene of the greatest activity in the building of homes, there being in the neighborhood of sixty new bungalows, either under construction or preparations being made to start the work. At present eight-inch water mains are being laid the entire length of the street and many foundations for homes are already in. Streets will be paved and curbs in within the year, and other modern conveniences provided the home-builders here is where the Pacific Electric Railway Company is active in providing means for its employees to obtain comfortable homes, reasonable, and within their means.

The provision of suitable homes at moderate cost is the best and surest antidote for industrial unrest and such efforts on the part of any industrial concern are deserving of hearty support and commendation. It would be a great thing for Torrance should other industries do as the Pacific Electric.

But of course, the number of people reached through this expedient is limited; there will still remain a great class of salaried workers, to be provided for, and it is for these people that a constructive effort should be made. Let the men who understand realty conditions, and who are familiar with building materials, conditions get together, not merely to adopt a slogan to be shouted abroad, but to show the average man how, where and when he can build to the best advantage.
