

—Wouldn't it be a great relief to you, if you could say to your printer: "I need a catalogue, a circular, some letterheads and envelopes," and then to dismiss the matter from your mind in the confidence that he will do the work to your entire satisfaction. The printer comes to you with a proposition that pleases: that has a strong advertising value in the suggested copy, in the proposed typography, in the general layout. What a satisfaction to have an assured confidence that the finished product will meet your approval.

The printer who can do that for you must offer efficient service.

That is what the Torrance "Enterprise" and Lomita "News Letter" are giving to their numerous customers, and we are ready to do the same for you.

### HOME BUILDING

The home building and home building instinct is so real a part of life that it comes blossoming out every spring. The birds are about to build their homes again and every where, in city, town, and countryside the native desire for those of us who make the human kingdom what it is for a place of permanent abode. Back from Southern Isles members of the feathery tribes are coming to re-establish themselves or are in process of re-establishing themselves in the comfortable little holes in trees or elsewhere which have come to be regarded as homes. Man's finer sensibilities crave for the shelter of a home—an owned home—which, of course, is man's palace.

The real estate men are telling us once more that the time for building is here. Those of us who have dreamed dreams along this line do not have to wait on the realty men to tell us, for dreams of some always awaken fresh with the spring. Yet we commend the realty men for their thoughtfulness, since every home they persuade a man to build means that much more toward the general prosperity of the community.

We believe that the man who has delayed building a home for the past two or three years is going to find this spring the ideal time to do so. He is sorry now, of course, that he did not build before the war. But there is an equal chance that three years from now he may be sorry he didn't build in 1921.

In face of present-day prices and from what we can read and hear about building operations throughout the land, we really and truly believe that the man who builds his home this year will be doing a very wise thing.
