

Mr. and Mrs. Fred Lessing and sons, Mr. and Mrs. W. W. Woodington and Mr. and Mrs. H. R. Woodington of Arlington avenue were guests of Mr. and Mrs. Geo. Lake of Long Beach Monday evening.

When washing hems of white dress skirts and underskirts, spread them on the drain board of your sink and rub soap on and in with hand brush. Soak for half an hour in hot suds and need almost no rubbing. Napkins and towels which have seen their best days can be treated the same way.—M. O. L., Los Angeles.

RECEPTION FOR NEWLY-WEDS

Mr. and Mrs. H. R. Woodington returned home Friday to their home at 2013 Arlington avenue to find that both the front and back entrances were quite elaborately decorated with well-worn household articles. The interior had been beautifully decorated with flowers, all ready for occupancy. Even the wedding gifts had been opened and put in their proper places.

On Saturday evening following twenty-five friends and relatives gathered and gave them a surprise shower. Refreshments were served and all had a most enjoyable evening.

MR. and MRS. J. C. McVEY, Managers

LISTENING IN ON THE WORLD!

Next to the automobile, the most amazing thing of this century, perhaps, is the way the wireless has spread among amateurs in America. The U. S. Navy asserts that 500,000 boys, girls and young men have such radiophone plants, most of them costing from \$10 to \$25. This is an average of 10,000 to each state—but of course some states have several times 10,000.

Every night news in Morse code or lectures or addresses or concerts are sent out from central stations in cities for the benefit of these amateurs.

The United States Navy exercises a certain control over these amateurs through what is known as the "Navy Radio Amateur Bureau." This bureau sends the amateur copies of secret codes, arranges concerts and lectures for them and otherwise interests them. An amateur writing to Popular Science Monthly says the bureau even sent him a personal message soon after he joined.

The same writer says that when he first got his apparatus together, he took it out on the porch. The wire touched a standpipe on the porch, and instantly he heard music. Wireless sounds come through the air like ripples on a pond, and washed against the receiving wire. In this case they washed against the metal standpipe, and the minute the wire touched it, the concert that was in the air at the moment began to reproduce on the apparatus in his house.

If any of our community boys are interested in becoming amateur radiograph operators, they should write "United States Navy Radio Amateur Bureau, New York City."

BIRTHDAY PARTY

A very enjoyable birthday party was given at the home of Mr. and Mrs. C. Hansen of Weston street on Saturday evening in honor of their daughter, Miss Lillian.

Those present were Mr. and Mrs. Cy. Vanderbecker and daughter, Avis; Mr. Will McCart of San Pedro, Mr. and Mrs. Paul Edwards and children, Opal, Olive, Mildred and Pauline; Miss Lillian Hansen and Mr. and Mrs. C. Hansen. Refreshments of ice cream and cake were served by the hostess. A very delightful evening was spent by all. Selections on the piano by Miss Lillian and violin by Mr. McCart were highly appreciated by those present.

Miss Anna Fitzhugh was a week end guest of Mr. and Mrs. J. A. Fitzhugh.

WONDERS OF AMERICA

By I. T. MAXWELL

CZAR OF SMOKESTACK WORLD

THERE are some smokestacks that are unbelievably big—too big to be true—but the one recently completed for the reduction works of the Anaconda Copper Mining company at Anaconda, Montana, sets up a new world record.

The concrete base on which this gigantic structure stands required 118 cars of crushed rock, 60 cars of sand and 20,800 sacks of cement to complete and weighs approximately 9,250 tons.

The stack proper is constructed of specially shaped blocks or bricks about two and one-half times the size of the ordinary brick and it took 2,464,672 of these larger units to complete the job.

To make the mortar necessary to lay these brick required 77 cars of sand, 87 cars of fire clay and 41,350 sacks of cement. The estimated weight of the brick work is 23,810 tons.

The exterior diameter of this smoke-and-gas elevator is 86 feet at the base, while the interior diameter at the top tapers down to 60 feet. The wall is 22 inches thick at the top. The maximum height of the stack and its base is 585 feet 1 1/4 inches.

ABRAM C. WINTERS PASSES AWAY

Abrams C. Winters passed away at his home in the Brighton Apartments Thursday, October 13, 1921. He was born in Pittsburg, Pennsylvania, November 1, 1866, where he grew to manhood. He was one of the five sons of John H. and Elizabeth Winters. On November 20, 1888, he married Matilda Rathleder. He has been a glass worker all of his life, as was his father and four brothers. He leaves besides his wife a son, John Roy; two grand-children and four brothers, John, George, Blise and Riggs Winters.

The funeral was held Monday afternoon in the Central Evangelical church, when Reverend Zeller spoke

The Masonic Lodge will be dark on Friday night, October 21. The next meeting of the O. E. S. Chapter will meet Thursday evening, October 27, for initiation.

Mr. and Mrs. Archie Woodington of Long Beach were guests Sunday of Mr. and Mrs. W. W. Woodington and Mr. and Mrs. H. R. Woodington of Arlington avenue.

The Ladies' Aid of the Baptist church met Thursday at the home of Mrs. H. M. Tolson of Arlington avenue. The regular business meeting was held and afterwards a social afternoon.

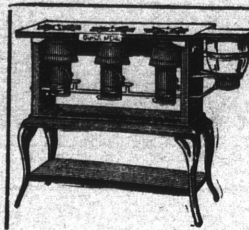

words of comfort to the bereaved family. He was buried in Inglewood Cemetery.

Your Home Paper
What It Can Do for You-----

Week after week, it prints in detail the happenings of the community. Faithfully it sets forth the goings and comings of its people, giving careful attention to the little items that are ignored in the overcrowded dailies of the big cities.

It furnishes you with more interesting information about people you know, or used to know, than could a dozen private correspondents. The one who writes to you may know only a few of your friends at home—but your Home Paper knows them all. It tells you about people you are interested in.

Finally, in a good, hard business sense, your Home Paper is of value to you. It keeps you posted as to the industrial and commercial growth of a community which familiarity may have caused you to neglect. It often reveals that keen people see, right in your home town, a mine of golden opportunity. The moral is quite obvious—
