Little Talks About Bank of America by the President

Not only do we offer the protection of great financial strength, and the convenience of the most modern banking facilities— but something equally as desirable, we believe—a friendly atmosphere of goodwill and cheerfulness that lots of folks have never quite associated with the banking business.

Over 1,000 cities laid concrete streets in 1925.

Why Compton, California Paves with Concrete

No wonder so many cities in this state are paving with concrete.

Why shouldn't they when they have learned the profit of concrete pavement from California's 4,000 miles of concrete roads?

Compton began laying concrete street pavement several years ago, and now has over 500,000 square yards.

Property owners consider this pavement one of the best investments they ever made. They have found that it costs practically nothing to maintain, and that it has set a pace for greater progress all around.

They also like its clean, neat appearance: its true, sturdy surface, its attractive, light gray color.

Add to these advantages the merit of skid-free safety, and you will agree that in paving its streets with concrete, Compton has chosen wisely.

What concrete streets have done for Compton, they will do for any town or city.

All of the facts are in our free booklet on "Concrete Streets." Ask for your copy.

Amp's Advice to Autoists (Illustration of a man with a battery terminal)

"DON'T let corroded terminals put the brakes on your battery, when a few strokes of a wire brush will keep the path of the current free. Quicker response when you step on the starter. Battery stays charged, too. We will be glad to clean the terminals of your battery if you will come in."
