## Three figures which mean extra motor car value

Buick motor cars are now designated by their wheelbase lengths. Series One Fifteen has 114½ inches of wheelbase. Series One Twenty is 120 inches from axle to axle, and Series One Twenty-eight measures 128 inches.

Many cars, several inches shorter than Buick and without advantages offered by Buick design, are priced considerably higher.

Compare the wheelbase length of other cars to Buick, before you spend your money.
