Ticker's Tips

Dear Friends: A man brought a clock in here last week.

He said: "I'll run if you lay it on its tummy." Guess it was some relation to a worm.

But the boss put it on the operating table and took out about half a bushel of machinery, and after he got it back together again that clock would run all rared back on its hind legs like a clock ought to run; and at just the right speed too.

So if you have a clock that has contracted the spring fever and will only run lying down, I'd suggest that you bring it in here. Howard's have just the right tonic that will put it on its feet.

And if an operation is necessary they know just where to make the incision.

Ticker.

P. S.—I wish a few more of you would mention these ads.
