Consider your Adam's Apple!!* Don't Rasp Your Throat With Harsh Irritants

"Reach for a LUCKY instead" Place your finger on your Adam's Apple. You are actually touching your larynx—this is your voice box—it contains your vocal chords. When you consider your Adam's Apple, you are considering your throat—your vocal chords. What is the effect of modern Ultra Violet Rays upon tobacco? Dr. E. E. Free, one of America's well-known scientists, who was retained by us to study Lucky Strike's manufacturing process, addressing the Illuminating Engineering Society, said: "The essential effect of the Ultra Violet is the production of better tobacco and of cigarettes regarded by virtually all smokers who have tested them as milder and with a lesser tendency to cause throat irritation."

Here in America LUCKY STRIKE is the only cigarette that employs Ultra Violet Rays in connection with its exclusive "TOASTING" Process—the only cigarette that brings you the benefits of the exclusive "TOASTING" Process which expels certain harsh irritants present in all raw tobaccos.
