A "Timely" Christmas Gift

Clock Controlled Natural Gas Range

Time is saved by a clock controlled, natural gas range. The clock turns on the gas, and turns it off, at the appointed hours. The automatic oven heat regulator keeps oven temperature constant at the point selected for cooking. Practically any food can be perfectly cooked, from start to finish, while the home manager gives her attention to other matters.

Oven insulation and new type burners make cooking with natural gas even more economical than before. An entire meal may be cooked for as little as a quarter of a cent a person a meal.

For a "timely" Christmas gift, select a new natural gas range from the display of your dealer or gas company, and look for the Blue Star Seal of the American Gas Association Testing Laboratory.
