GENERAL ADDS NEW TRUCKS

Photo shows one of the fleet of five new truck and semi-trailer units just put into service by General Petroleum Corporation, producers and distributors of General Mobilgas. Heavy increase in the company's business makes the additional haulage units necessary.

Evidence of the way in which an uptrend in one industry favorably affects business in many unrelated lines is disclosed by the recent purchase of five new truck-and-trailer units by General Petroleum Corporation for the haulage of its General Mobilgas.
An intensive advertising campaign, in which newspapers are playing the leading part, has resulted in boosting the company's taxable gallonage sales on the Pacific Coast to such an extent that additional haulage equipment has been found necessary to handle deliveries to service stations. The five new motor units are the answer, and motor makers, dealers, tire manufacturers and tank and body builders are the beneficiaries.
The trucks are the new model Dodge Sixes built especially for use with a two-wheel semi-trailer tank unit known as the Lapeer type trailer. They are special jobs of 1500 gallons gasoline capacity, divided into four compartments, and are considered by transportation experts to be the last word in modern fuel haulage equipment. Tanks, tires and trailers were all made on the Pacific Coast. The five new units have been allocated to service in different parts of General's Pacific Coast territory.

Utah Salt Beds May Be Scene of Speed Test In July

SALT LAKE CITY, Utah, (U.P.)—Sir Malcolm Campbell and his famous "Bluebird" probably will challenge his own world's land speed record of 272 miles per hour, on the salt beds of Great Salt Lake some time in July.
William F. Sturm, American representative of the British automobile racer, said tests of the salt beds proved suitable for the run. Further examinations will be made, however, before the final decision is made.
It will be necessary to construct a track large enough to allow seven miles in which to warm up, one mile for the clocked run, and four miles to slow down. The proposed site was near Silduro, Utah.
"I think the course finally selected," Sturm said, "should be one of not less than 12 miles and preferably one of 14. When a tentative course is decided on, a permanent course should be figured approximately 600 feet wide. Soundings should be taken, both at the edges of such a course and likewise in the middle, so that no mistakes will be possible. This would involve considerable time for inspection, but will be far safer."
Sturm said Sir Campbell plans to bring his new \$100,000 machine of 2500 horsepower, providing further tests prove the beds can hold the five-ton automobile.
