

"Men In White" At Plaza Tuesday

Clark Gable, who had recently emerged from a hospital where he underwent an appendicitis operation when "Men In White" was in production, found a new type of ultra violet ray lamp used in the film useful between "takes." The star passed much of his spare time reading, allowing the beneficial rays of the lamp to play on him. The lamp, it is said, will penetrate normal clothing and will not injure the eyes when reading. It was part of the elaborate medical equipment used in the dramatic story having a background of modern hospital life. Myrna Loy is co-starred with Gable in the new film, which opens Tuesday, June 12, at the Plaza Theatre in Hawthorne.

International Chess News The world championship match between Dr. A. Alekhine, champion, and E. Bogoljubow, contender, recently terminated finds the doctor still ensconced upon the coveted throne. The score: Dr. Alekhine 6, Bogoljubow 1, and 17 draws.

One must be hard and cold as stone indeed not to experience at least a tug at the heartstrings when reading of the world-wide efforts to create a fund as a tribute to Dr. Emanuel Lasker in recognition of his long service in the ancient game. He wore the world champion's crown undisturbed for 27 consecutive years, when he was finally dethroned by the Cuban grand master, Capablanca. The aged master is now retired from active play, resides in Holland, and on December 24, next, hopes to celebrate his 66th birthday.

What do the masters of the world do for a living when not actually engaged in "pushing wood?"

Dr. Alekhine is a lawyer in Paris; Capablanca is a consular agent in New York; Dr. Lasker, is a professor of mathematics in Holland; the late Dr. Tarrasch, was a physician in Germany; Flohr is a newspaper man in Czechoslovakia; Kashdan is a magazine publisher in New York; Kupchik is a film salesman; Duke is a
