## Paris Styles

PARIS. (U.P.)—The word "button" has changed its meaning. It is today, even according to the dictionary, a "knob, disk, or the like, to be sewn on an article of dress, usually as a catch." A small knob, piece of growth suggestive of a button.

Modern buttons are eyeless and range in size from a flyspeck to dinner plate. In fact, a Paris button being featured at the moment is the size of an American dollar and grooved finely in exactly the same way as a flat record.

Schlapavelli, of course, is the button bandit here. She has held up more ideas from this family and extorted from it the entire family resources. This season her black and white "band" have created the sensation they deserve. She also has created a "leaf" fastener, done in wood, crystal and ivory. These, it is suggested, will make excellent fall fastenings, tinted varying shades of a rich golden brown, deep green and fleckering yellow, used on ensembles of solid color.

### TODAY'S FASHION TIP

Buttons are most important. The word covers all forms of fastenings from hooks to hinges made of wood, metal, glass and straw.
