Comedy-Drama to Be Presented At Clubhouse Tuesday

"Applesauce" will be served to the people of Torrance next Tuesday evening at the Torrance Woman's Club. The Scottish Rite Players, of Long Beach, will be the cast.

"Applesauce" is a three-act comedy-drama full of sparkling philosophy, hilarious comedy and intense dramatic situations. It is the story of a typical American group of people...

Famous Radio Stars At Firemen's Dance

of High Jinks fame were featured guests at the Torrance firemen's annual dancing party, given last night at the Hollywood Riviera.

Rock Gardens Easy to Build and Attractive In Any Yard

While the southern part of California may not be quite as well adapted to this type of gardening as the north Pacific slope, yet splendid results may be obtained and an even greater variety of materials used though more attention needs to be given to exposure and watering.

It was considered that rock gardening could be practiced only on large grounds; in later days, however, the small rock garden has become increasingly popular both in England and America.

For the small rock garden, either the rocky slope coming down in broken terraces to a bordering path, or the ravine are recommended. In the latter, the path runs through the garden, both sides sloping irregularly up ward, these rising sides being further emphasized by a background planting of tall perennials and shrubs.

No matter what the form, one provision must be made at the start, that is drainage. Rock plants in general and particularly alpine like porous gritty soil and a cool root run. On level ground especially it is necessary to place drainage beneath the garden soil and in heavy soils a layer 18 inches thick is not too much.

The stone to use will be governed by convenience, but stone of the neighborhood will always look natural. Rough stone, irregular in shape is best and not too many large or many small pieces should be used.

Most important in placing the stones is to make them slope inward so that falling water will be carried down to the roots of the plants. Arrange little bays and promontories and sweeping curves rather than straight lines.

Exposure is not very important as success may be gained, facing in any direction, providing the proper subjects are used. Facing west or south, use more sun loving plants; facing east or north, rather the real alpine.

A few popular rock garden subjects and the approximate time of blooming follow: Achillea Tomentosa, yellow, June and on.

Atropa Reptans Rubra, Purplish blue, May and June. Alyssum Saxatile, yellow, May and June. Anemones, in variety, Various, Autumn.

It saves steps to read the ads and make up your shopping list in the privacy of your own home. Bargains galore without moving from your chair.

Torrance Is Picking Up

Furnished houses are very scarce but I have some, I also have several good unfurnished homes. The best of all, is the fact that I have some clients who believe in the future and they are beginning to pick up the bargains.
