Catalina Avenue Roadwork Done

Workers provided by the L. A. county relief administration have completed their share of the improvement of Catalina avenue, the administration having expended \$29,770 on the project. The work, which consisted of cut and fill work to widen the roadway 20 feet on each side, was preparatory to paving. The improvement was effected between the north entrance of Palms Verde Estates and the south city limits of Redondo Beach. Work began last October and was considerably delayed by rainy weather.

LOW ELECTRIC RATES In Southern California

During the past ten months the Federal Power Commission has made a national survey of rates charged for electric service in 191 cities. According to the official tabulation, the territory covered by the Southern California Edison Company enjoys some of the lowest rates in the country.

For more than forty years this Company has always kept its producing and delivery equipment well ahead of the needs of its customers, thus providing for the unhampered growth that has made the Southland the wonder section of the world.

Eleven major voluntary reductions in Edison rates have been made in the past ten years. Still lower costs are now offered to users of electric ranges and electric water heaters. Charges as low as one cent per kilowatt are available to full-use customers... under the domestic wholesale rate.

Electricity is cheap. You can make it cheaper, for the more you use the less you pay per unit. The all-electric home is the mode of today—and tomorrow.

FORD SALES HEAD IN SOUTHLAND

Buyers of the most hopeful outlook for national recovery in many years. W. C. Cowling, director of sales for the Ford Motor Company, addressed 200 Southern California civic and business leaders at a luncheon last Monday. "Conditions on the West Coast look far better than they did last year—even better than in the East," Mr. Cowling stated. "Effective March 1st, the Ford Motor Company has been producing cars at its full capacity of 6,000 a day, the March production schedule calling for 160,000 cars, compared with 130,000 cars in February and 101,000 in January. "The Long Beach assembly plant will turn out cars as rapidly as the territory can absorb them—as many as 250 and 300 cars per day. The Ford Motor Company now has 15 assembly plants in operation, compared to eight one year ago.

New Circuit Across Pacific Brings Japan Within Voice Range of the U. S.

"Dochirae okakede gozaimasu!" says the long distance telephone operator in Japan, meaning "What place do you wish to reach, please?" And if the calling person in Tokyo, for example, places a call for someone in the United States, the operator replies "Shochi tashimashita," which means "It will be done." It can be, too; for telephone service between this country and the Flowery Kingdom is now available to the general public.

Official Greetings Exchanged Taking part in the ceremonies which formally opened this newest overseas telephone service last December were Secretary of State Cordell Hull and other government and telephone officials in Washington, and Japanese Foreign Minister Koki Hirota and other government and telephone officials in Tokyo. As the greetings were exchanged across half the world, it was seven o'clock in the evening in Washington, and nine o'clock the next morning in Japan.

Japan is the 60th Country Japan is the sixtieth foreign country to be brought within voice range of the United States. That leaves only three countries having important telephone systems still to be added to America's list of overseas contacts. These are China, Russia, and New Zealand.

With voices flashing across the Pacific between this country and Japan in the fraction of a second, it is interesting to recall that Japanese was the first foreign language ever spoken over the telephone, and that there are now living a noted educator and two statesmen of Japan who can remember when all the telephone service in the world con-
