HIGH SPEED PLANES USE 1,000 GALLONS OF GAS IN TRIP

Here is one of United Air Lines three-mile-a-minute twin-engined transports, which burns 63 gallons of gasoline per hour and requires 1,000 gallons for an over-night coast-to-coast flight. A three years' supply of gasoline, involving the delivery of a minimum of 27,000,000 gallons or equivalent to 3,375 tank cars of gasoline, has been contracted by United from the Standard Oil Company of California, and the Standard Oil Companies of Indiana, New Jersey, and Ohio, it was announced this week by W. CHRISTIAN SCIENCE CHURCHES

"Substance" is the subject of the Lesson-Sermon on Sunday in all Churches of Christ, Scientist, branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts. The Golden Text is from the epistle to the Hebrews: "Now faith is the substance of things hoped for, the evidence of things not seen."

Among the Bible verses in the Lesson-Sermon are the selections from the Proverbs: "I wisdom dwell with prudence, and find out knowledge of witty inventions. Counsel is mine, and sound wisdom: I am understanding: I have strength. My fruit is better than gold, yes, than fine gold; and my revenue than choice silver. I lead in the way of righteousness, in the midst of the paths of judgment: That I may cause those that love me to inherit substance; and I will fill their treasures."

A correlative passage from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, states: "That which material sense calls intangible, is found to be substance. What, to material sense seems substance, becomes nothingness, as the sense-dream vanishes and reality appears."
