Tips That Beautify

**CARE OF THE HANDS AND NAILS**

By Myrtle Perkins Melz

Well-kept nails are essential to properly groomed hands. Due to the forced daily use of harsh soaps in hard water, nails become brittle and hands coarse and rough.

It is only by the exercise of extreme care, the use of lotions and creams, and religious visits to a professional manicurist, that you may hope to keep your hands at their best.

Many do not realize that nails as well as the skin must receive oil applications to keep them smooth and the cuticle soft.

Finger nail oils if good will not harm polish on the nails.

Especially care should be taken to avoid any but an oil polish remover. Removers which have alcohol or ether as a base, dry the tissue and definitely harm the finger nail itself.

**THE MAYTAG SEDIMENT TRAP makes clothes cleaner!**

When Maytag introduced the cast-aluminum tub washer, with Gyrtator washing action, new speed and gentleness were brought to home washing. But there is another reason why a Maytag makes the clothes so clean and white. It is the sediment trap underneath the Gyrtator in the bottom of the tub. The grit and grime collect in this trap, instead of being washed back into the clothes. This is just one of many advantages which won world leadership for the Maytag. Each week a Maytag creates savings to help provide the easy payments. Any Maytag available with gasoline Multi-Motor.
