THE LIFE OF TORRANCE

THE SUBSTANTIAL and expanding payrolls of Columbia Steel Company have been a basic factor in the life of Torrance from the very inception of this city. It is significant that at the same time Torrance is celebrating an important milestone in its development, so also is Columbia employing the greatest number of workers in the history of its Torrance plant.

Today, mature in experience but young in outlook, the company is extending its facilities to make an ever larger contribution to Torrance progress in the years ahead.

It is gratifying to know that the city is also increasing its facilities for the education, recreation and entertainment of Columbia employees and their families during their leisure hours, as well as other residents of the community.

So on this happy occasion, Columbia Steel Company extends its hearty congratulations to Torrance and all its citizens.
