

SHELVES BETWEEN ROOMS PRACTICAL

Sometimes shelves may be built in between rooms. If the walls of a house are fairly thick, there is often room for shelves at either end of a double doorway leading from living to dining room. If you have dishes or books that you would like to display in this fashion, consult your architect when building a home.

CHRISTIAN SCIENCE CHURCHES

"Substance" is the subject of the Lesson-Sermon in Sunday in all branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts. Paul's words to the Romans: "If we hope for that we see not, then do we with patience wait for it," are the Golden Text.

One of the Bible citations in the Lesson-Sermon is from the epistle to the Hebrews: "Through faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear." Another Bible citation is from Revelation: "Thou art worthy, O Lord, to receive glory and honour and power: for thou hast created all things, and for thy pleasure they are and were created."

The Lesson-Sermon includes also these passages from "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "The fading forms of matter, the mortal body and material earth, are the fleeting concepts of the human mind. They have their day before the permanent facts and their perfection in Spirit appear. . . . Mortals must look beyond fading, finite forms, if they would gain the true sense of things."

CLOSED SHOP

TORRANCE ELECTRIC SHOP has adopted the "Closed Shop" policy which means that only skilled UNION ELECTRICIANS carrying cards of identification from Local 83, International Brotherhood of Electrical Workers, are employed.

What a 100% Union Shop Means to YOU!

1. All work is done by Skilled Electricians who have proven their ability by having passed rigid examinations, thus protecting you against fire hazards with the added advantage of having the work stand up for years instead of "patched up" jobs of temporary duration, so common with unskilled workmen.
2. The assurance that your work will continue uninterrupted without labor trouble and costly delays during the course of construction.
3. Improved working conditions, shorter hours and better pay, all of which attracts a higher class of workmen,—and results in greater efficiency. For YOU, greater efficiency means a Better Job without Added Cost.
4. Our large investment in specialized tools and equipment enables us to work more efficiently and do a much better job,—at a VAST SAVING IN TIME.
5. In addition to employing ONLY skilled Union Journeymen, the Torrance Electric Shop is one of the few in this district which has a Supervising Electrician who has an A, B, C, D, E, and S rating under the exacting Los Angeles County Electrical Code, which is patterned after the California State Code and approved by the National Board of Fire Underwriters. This means that we are qualified to do any kind of job, including public buildings, theatres, industrial and similar highly technical wiring and installation work which is subject to the most rigid inspection.
