## EYE OPENERS --- by Bob Crosby

There are many superstitions about the Praying Mantid. The Japanese, when sleeping, tie them near to eat the troublesome mosquitoes. The female is very brave and often eats her much smaller mate.

While much of Greenland is uninhabitable, population figures are startling when compared to such a heavily populated country as Japan, where there are more than eighteen

thousand persons to each fifty square miles.

Natural gas is rated at approximately 1100 B.T.U.'s and manufactured coal and water gas as served in many sections of the East is rated at about 550 B.T.U.'s. There are 33 producing major natural gas and oil fields in California, and gas appliances serving a population of 6,000,000 in California are connected by a network of transmission and distribution lines with all of them.

© 1937 by R. M. Crosby

## Congressman Colden at the Capitol

By CHARLES J. COLDEN  
WASHINGTON, June 17. (Special to The Herald)—Every time I have voted for nuisance taxes, I had hoped that it would be the last time. Because this revenue is more than a half-billion dollars yearly and Uncle Sam needs the money, the House has again performed this unpleasant duty.

Some of the nuisance taxes are justifiable because they are levied on luxuries, while others weigh heavily on the necessities of life.

The one cent per gallon that you pay the federal government as a gasoline tax raises a total of about \$200,000,000 annually. This item is not so difficult to pay for the reason that the government appropriates several hundred million dollars per year to states for the building of roads; so in this case, the taxpayer receives more in return than he really pays out.

**COSMETICS INCLUDED**... The tax on electricity brings in about \$36,000,000 per year. The tax on lubricating oil nets around \$30,000,000 and levy on telegraph, telephone and radio facilities brings in another \$24,000,000.

The women members of the House, Mrs. Norton of New Jersey, Mrs. Honeymoon of Oregon, and Mrs. Rogers of Massachusetts, complained that cosmetics are a necessity and should be relieved of tax. But because most of these expenses fall on the old men of the house, members refused to cut out this revenue, amounting to about \$15,000,000. The tax on matches, which falls on the poor as well as the rich, gives Uncle Sam a nice nest-egg of about \$7,000,000 a year. Sporting goods and radio sets each furnish about the same amount.

**POSTAGE REVENUE**... Members of Congress have received much propaganda against the tax on furs, which yield a tax of about \$6,000,000. Firearms, shells, etc., yield \$3,000,000 and the little insignificant item of chewing gum brings in an annual revenue of about \$300,000. Automobiles, motorcycles and trucks; tires and tubes and automobile accessories, bring in a total of around \$110,000,000. The tax on refrigerators yields approximately \$7,000,000. The tax of two cents on the thousand old-fashioned matches, and only one-half of one cent on a thousand of give-away packages, do not appear to amount to very much, but it is rather amazing when you find that the total amount of revenue amounts to \$7,000,000 per year.

The most serious objection to the nuisance taxes is the extra one cent postage on out-of-town letters. This one cent yields the government from 80 to 90

million dollars per year. That is another startling illustration of "little drops of water, little grains of sand" and so forth.

**\$39 PER MONTH**... The national income is always a subject of great interest. The Department of Commerce has just made public the report for the year 1936. The total of the income of all the people of the nation, which includes wages, salaries, rents and dividends, amounted to \$62,056,000,000—an increase of \$7,411,000,000 over 1935. A noticeable feature of this report is that, while wages increased 14 percent over 1935, dividends increased 50 percent. But wages were 66.5 of the aggregate national income, while dividends comprised but 7.4 percent of the national income.

Estimating the population of the country at 130,000,000, the average income of all the people of the nation is approximately \$470 per year, or about \$39 per month, and less than \$10 per week. It should be remembered that there are numerous very large incomes in this country, which reduce the average of the people of low incomes. One must not forget that only a portion of the people of the country are employed. There are the housewives, the children in schools, the aged and the incapacitated and the unemployed. The average earnings of all those employed, according to government statistics, is \$1,244 per year, or a little less than \$104 per month. That means about \$26 per week for the wage-earner, out of which he must pay his rent, insurance, groceries, clothing and the support of those who are dependent upon him.

**JOBLESS OBSTACLE**... One of the big problems of this country is not only a fast distribution of wealth throughout the country, but also the increase in the production of wealth. This can be done only by a wider employment and the development of a greater purchasing power of the people.

The greatest loss suffered by this country is from the ten million of unemployed. If these people could be employed, at say, a modest wage of \$5 per day, it would increase the income of the country \$50,000,000 per day, and on a five-day week, \$250,000,000 per week, or a billion dollars per month.
