Injunction Sought To Bar Tax Sale

Suit for an injunction to prevent the sale of a lot in Torrance at a tax sale scheduled for Aug. 14 has been started in Los Angeles county superior court by Paul O. Davis and Otto A. Jacobs.

The lot is a portion of Lot 9, Block 104, of the Torrance Tract. It was sold to the state for 1931 and 1932 taxes, and more than five years having elapsed since it was deemed to the state, the county put it on the sale list several months ago.

Basis of the suit is the tax levies made for the years 1931 and 1932, which it is claimed are illegal in that too high a tax was levied. Because the tax is void, the sale to the state was void and the proposed sale at public auction to the highest bidder would be void, it is contended in the complaint.

Americans use about 11,000,000 pounds of fats and oils a year—67 percent in the form of food, 20 per cent as soap, 8 per cent in paints and varnishes, and the rest in varied products.

Fast Drivers Won't Get Tires

The Torrance Tire Rationing Board hereafter will be given access to the names of all persons who are stopped by high-speed patrolmen for driving at speeds above 40 miles per hour.

An announcement in Sacramento this week by Patrol Chief E. Raymond Cato said the record of each citation is being placed in the file maintained by the Division of Drivers Licenses showing the complete history of all persons holding licenses.

Scully Endorsed For State Senator

A businessman of high repute, Thomas P. Scully, is a candidate for State Senator in the 38th District. In recognition of his record, a number of organizations and civic leaders have given him their endorsement.

Included in the list backing Scully for the state senatorship from this district are all of the Railroad Brotherhoods, the Los Angeles County Grand Jury Association and Dist. Atty. John Dockweiler, it is reported.

Throw your scrap into the fight!

THE MARINES HAVE LANDED!

A thrill went through the United States when the first complete communique of the Navy on the attack on the Solomon Islands said tersely:

"It has been confirmed that the United States Marines have landed as scheduled."

That is what the Marines have always done. It was a Marine officer in France who, when ordered to retreat, exploded: "Retreat? Hell! We just got here!" It was a Marine sergeant who, when he thought his men wavered in a bayonet charge, bawled: "Come on, you do you want to live forever?"

When the U. S. forces eventually close in on Tokyo, the announcement will come as sure as rain and sun: "The United States Marines have landed as scheduled."

War Production Changing Nation's Way of Living

McCarty Wins Strong Support

VICTOR D. MCCARTHY

One of El Segundo's outstanding citizens, Victor D. McCarthy, who is now serving his 26th year as city clerk, is a candidate for Congressman from the 17th District in the primary Aug. 25. McCarthy, who was born at Mare Island Navy Yard, has been a resident of Los Angeles county for 31 years.

His background, in addition to his public service, includes work as director of El Segundo's Defense Council and deep interest in many social and fraternal bodies. He studied law at Loyola University and has been active in the Institute of Government at U. S. C. McCarthy has been director of the League of California Cities and president and secretary of its municipal finance officers division.

He says: "Our prime objectives now are to win the war and to perfect a permanent peace." He has two sons (one in the Navy) and has won endorsement from many city officials, fraternal heads and labor groups.

The U. S. used about 82 pounds of fats and oils per person last year.

Last year, hosiery manufacturers made a dozen pairs of silk or Nylon stockings for every woman in this country—including girls 15 or older. This year, instead, the industry probably will turn out about seven pairs of rayon stockings for each woman—thus saving precious silk and Nylon for parachutes and other military uses.

Glass stoves may take the place of metal ones to save steel for making tanks and ships. Manufacturers also are considering terra cotta, cement, and fibre-board as substitute materials.

The United States could, in the war effort, use about 50 per cent more metal than she can produce, through 1943, a recent survey showed. That's why so many metal goods, from lawnmowers to kitchen sinks, have had to be discontinued "for the duration."

Shellac, which comes from the lac beetles of India, is vital to the making of phonograph records. But the average 10-inch record contains about two ounces of shellac—about the same amount that goes into the making of a signal flare or Very light, rather important to the crew of a ship in distress.

Coffee is rationed, will be because soldiers need plenty of it in their business. A soldier drinks twice as much coffee as a civilian, on the average. The official Army ration is 45 pounds per man each year—enough to make 1800 cups of coffee.

The baby carriage industry is being converted from metals to wood; 11,000 tons of steel will be saved by substituting wood.

BATTLE OF THE BALLOTS

On July 4, 1861—while the Union rooded under the initial shock of the civil war, while years of bloody warfare loomed black before the nation—Abraham Lincoln told a bewildered, divided Congress:

"Ballots are the rightful and peaceful successors of bullets."

The profoundly wise Emancipator saw every election of all time as a battle of men with weapons, just as a clash of arms is a battle of men with weapons; but a battle in which no force can be exercised other than the peaceful force of human thought.

Such a battle will be fought by millions of Californians next Tuesday, Aug. 25, in the most important primary election since California became a state. An impressive army of men and women—3,751,296 have registered!—have qualified to participate. And the man of affairs shall have an exactly equal voice with the man who shines his shoes in stating his choices among the candidates who aspire to public leadership and authority.

Through successive battles of the ballot the American people have established and consolidated rights unheard of in previous history. They have throttled dictatorship by class or individual, have crushed the demons of religious persecution and racial discrimination and group persecution that so sadly afflict much of the world today.

Yet the vigilance of the electorate must never be relaxed. Every battle of the ballot box is a skirmish in the never ending war to ensure continuance of human rights under democracy. The Californian who has the right to vote and does not exercise it at this time of crisis is letting down the men who are fighting on far battle fronts to preserve for him the precious boon of self-government—the priceless sovereignty of the ballot.

The qualified voter who does not cast a ballot in this election is a slacker on the home front.

No longer is there any need to wait for "week-end" low prices! Safeway's advertising is now in effect five full days, starting Tuesday of each week. Buy early—you'll find service faster, and selection better.
