# COFFEE RATION: 1 POUND - 5 WEEKS

Beginning at midnight Saturday, Nov. 28, every person in the country over 15 years old will be entitled to a ration of one pound of coffee each five weeks.

"Meanwhile," OPA authorities said, "there is no reason for anyone to run to the corner grocer, put the squeeze on him and try to force him to help a hoarder. There is absolutely no excuse for hoarding coffee at this time."

"We're announcing the forthcoming rationing now because we're going to have to talk to a lot of people in the coffee industry and elsewhere about the administration of the rationing program. Naturally, stories and rumors will be creeping around about what we propose to do. Most of them will be entirely garbled and thus create more confusion and hysteria than even now exists on the subject of coffee. We are therefore stating what we plan to do so that the public can get the story straight and from an official source."

**THE COFFEE STORY**  
"The coffee story is this—for ten years before 1941 we consumed about 13 pounds of coffee per capita per year. Last year, due to abnormal demands, this figure jumped to about 16 pounds. Thus far in 1942 we have consumed coffee at the rate of about 12.5 pounds annually. Therefore, a ration of one pound each five weeks per person over 15 certainly is not a drastic reduction."

Consumers will get their first coffee ration by surrendering the last stamp of their war ration book No. 1—the book now used only for sugar rations. Subsequent rations of coffee will be on coupons taken in sequence so on toward the center of the book. Specifically the stamp numbers are 28 down to 19. No book on which the age of the holder is stated at 14 years or younger will be valid for the coffee ration. Use of the book for sugar will continue exactly as in the past. Those who did not obtain War Ration Book No. 1 may get them from their local war price and ration boards now.

**TRANSPORT DIFFICULTIES**  
OPA was directed to under-

take the rationing program by order requiring restriction on sales from roaster to wholesaler to retailer, which resulted in turn from lack of ships to bring coffee in normal quantities from Central and South America. All sales of coffee at retail were frozen at midnight, Nov. 21, for this week before rationing starts, in order to permit retailers to stock their shelves for the beginning of rationed sales.
