## What NOT to Do Until the Doctor Comes . . . First Aid Instructions Approved by Red Cross

In this community today a bomb attack would find a relatively small number of people; physicians, nurses and well-trained first-idders—less than one person in 10—who know exactly what to do for injured victims.

The others—most of us—would be well-meaning, but untrained. They would try to dot something, anything to ease the plain, to stop the flow of blood. And they might possibly kill

There are five things, you can do: (1) Elevate the bleeding art; (2) firmly press a sterile compress over the wound (3) If that doesn't work, apply a tourning the totage between the wound and the heart—but only on arm or leg; the member to note the time of applying tourniquet and loosen slightly every 15 minutes if a doctor has not arrived; (5) If nothing else works, get into the doctor has not arrived; (6) If nothing else works, get into the streets of Lisbor and has restricted the number of agoline shortages.

DON'T

on can usually be cured. A ead patient can't. Don't fail to ind all the wounds.

whom they're trying to Amateur aid can be ter-

doctors and for the American Red Cross.

Join First Ald Classes

Dut to forestall needless tragedies, we are starting a series of brief articles—"What not to do until the doctor cones." Read them carefully, then apply to the Red Cross for a standard course in first aid. They may help you to save a life.

You may find out where First Aid classes are being conducted in your neighborhood by contacting the First Aid chairmen of the Torrance or Lomita branches of Red Cross. If no class is now in session, an adequate supply of instructors is available to tech. New classes.

quate supply of instructors is available to teach new classes. THREE ESSENTIALS This is the first in a series of first aid "don'ts" published as a service to readers. Three con-ditions demand immediate treat-

DON'T

ment by even an untrained rescuet—serious bleeding must be halted, stopped breathing must be started, burning chemicals must be removed. For everything else—relax. Don't move the patient, even if he's twisted and uncomfortable, or you may turn a scrious injury into a fatal one. Don't give him anything to eat, drink or smell. Don't worry about broken bones, apoplexy, epilepsy, internal bleeding, or concussion. Only a physician or trained first-aider can handle such things. If in doubt, don't do anything!
Your job is simple—first, have someone call a doctor; second, get rid of crowds, reassure the victim, keep yourself under control.

trol.

FIVE THINGS TO DO

Don't wait for the doctor
come if a man is bleeding
death. This, like stopped brea
ing, is another condition in wh
delay can be fatal. Don't w

### Report Discloses Gain In Marriages

There were 56,424 marriages in California from Jan. 1, 1942 through September, an increase of 56 per cent ahead of the sam period last year, the State Bureau of Vital Statistics reported today. Births reported in the state for the first nine months of this year totaled 109,053.

A classified advertisement in The Herald led to the saie this week by Mr. and Mrs. George Moore of their Palos Verdes home to a Long Beach man who is expected to take possession of the residence between the 10th and 15th of this month. Moore inserted the advertisement in last week's Herald and the sale followed within a few days.

of gasoline shortages.

tight or loose. Don't give him smelling salts!

Put him flat on his stomach, his face turned to one side, straddle his calves, put your hands on the small of the back, your little finger in line with his lowest rib and the tips of your fingers out of sight. Then swing forward, with your elbows straight, until your arms are straight up and down. Let go. Suit the amount of pressure to the size of the victim, so that lungs and internal organs are not damaged. Repeat this slowly and regularly twelve times per minute—FOUR hours if necessary. And when he starts to breathe, don't let him sit up. He may die of heart failure. Remember, you can also 'drown' if your chest is depressed by bomb, debris!

Here's Your Money For Gifts and Taxes

-aren't you glad you saved?

Yessir! Santa Claus came to town early for all the folks who joined the Torrance National Bank's Christmas Savings Club last year. If you've been putting away a little each week, or payday, you know what a grand and glorious feeling it is to get that check for Christmas shopping or taxes the first of December.

Now that we're all faced with increased war-time taxes, it's wise to save in advance, and the Christmas Savings Club is the ideal way of doing it.
