

Torrance Branch Red Cross Reports Activities, Needs

Mrs. Lola Hoover, Red Cross branch chairman, accompanied by her daughter, Mrs. Wincl-Rauss, represented the unit at the Los Angeles County Council meeting held Friday at Los Angeles. Mrs. Hoover presided.

Requests are being made for contributions of Christmas tree ornaments for service men's trees. Please leave them at headquarters, 1400 Cravens ave. Mrs. Maude Lock, production chairman, is asking for gifts of khaki buttons to be used in service men's kits and clean woolen articles of clothing to be made into laprobes for convalescents.

The unit gratefully acknowledges ten beautifully made quilt tops, gifts of Mrs. Sara C. Murray, 1514 Anapola ave., previously presented to various Torrance churches for Red Cross use. Mrs. Lock's production room ladies have been busily plying their needles quilting the tops.

Listen to your conscience before you take the train

A furlough is not much good to a soldier unless he can visit home. And vital war business may be delayed if war plant experts can't get on the train. All trains are full, so please don't make unnecessary trips. Before you plan a train trip, listen to your conscience!

Advertisement for Butadiene plant. Title: 'Fumes, Yes! BUT NOT FROM BUTADIENE'. Text: 'Plant Completely Closed for Necessary Repairs and Producing No "Fumes"'. Content: 'So many people have blamed the Butadiene plant for the "fumes" condition that has existed for the past week that this statement of fact is offered: On the morning of Tuesday, November 9, the Butadiene plant in Los Angeles—including the cooling towers—was shut down completely for routine maintenance and repairs. It has not been in operation since that date. However, this busy industrial area has continued to be troubled by "fumes" and haze under the adverse atmospheric conditions which have prevailed recently, and which prevent the outpourings of smoke-stacks, motor exhausts, etc., being carried away. "Fumes Eliminators" Being Installed We are pleased to report progress in the correction of the "fumes" situation at the Butadiene plant: (1) Foundations for the 45 closed "heat exchanger" units were installed prior to November 1. (2) Twenty-one of the 45 units had been installed on their foundations by November 16. When all 45 units have been installed and connected to the plant system, full Butadiene production can proceed without production of any fumes, and only clear water will flow over the cooling towers.
