Section 1. Section 8 of Ordinance No. 3549, New Series, entitled "An ordinance to regulate the use and operation of vehicles upon certain public highways in the County of Los Angeles, and to repeal certain ordinances," adopted March 28, 1940, is hereby amended by repealing subsection 3 of subsection 1 thereof.

Section 2. This ordinance shall take effect thirty days after the date of its adoption, and prior to the expiration of fifteen days from the passage hereof shall be published once in the Torrance Herald, a newspaper printed and published in the County of Los Angeles, State of California, together with the names of the members of the Board of Supervisors voting for and against the same.

By ALICE BURKS, Deputy Clerk.  
STATE OF CALIFORNIA, )  
County of Los Angeles, ) ss.  
I, J. F. MORONEY, County Clerk of the County of Los Angeles, State of California, and ex officio Clerk of the Board of Supervisors thereof, do hereby certify that at a regular meeting of the Board of Supervisors of said County of Los Angeles, held on the 23rd day of February, 1944, at which meeting there were present, Supervisors John Anson Ford (Chairman presiding), Gordon L. McDonough, Oscar Hauge and Roger W. Jessup, and the Clerk, the foregoing ordinance consisting of two sections was considered section by section, and that the said ordinance was then passed and adopted as a whole by the following vote, to wit:

**Railroaders with their THINKING CAPS on**

Here we tell you about some good ideas thought up by the people of our railroad to help Southern Pacific carry its greatest traffic load in history. Such ideas contribute directly to Victory, because the railroad is the war industry all other war industries depend on!

Only a few of the ideas received in recent months are represented here. And some of these devices can be fully appreciated only by railroaders. But these ideas have a common denominator everybody understands: All represent better ways to run a railroad!

And through the years the S. P. "family" has steadily pioneered such new ideas in railroading as low coach fares; moderately priced meal service in dining cars; and store-door pickup and delivery for less than carload freight. We operate more air-conditioned cars than any railroad west of the Mississippi.

You can be sure that S. P. men and women in the shops, yards, offices, stores and on the trains will continue their constant search for improved methods of railroading.

In this spirit of enterprise we find stimulation and encouragement for the future. Then, as now, good railroad transportation will be needed. With thinking caps on, S. P. is planning for peacetime progress NOW!

<p>These four men worked out a horizontal airjack which saves delay to flat cars and manpower in blocking of flat cars into rigid units for loading with long piling. S. P. District Car Service Agent J. E. Whalley, Eugene Car Foreman W. H. McAllister (left) built the first working model. W. E. Jackson drew blueprints for another at Eugene, where Master Car Repairer W. B. Medill (right) produced a second working model.</p>	<p>Watering of passenger cars has been simplified by specially-shaped extension pipe proposed by General Car Foreman C. H. D. Hansen of S. P.'s Mission Road Coach Yard.</p>	<p>Two hours time daily is saved by this device developed by S. P. Machinist Dow Nichols of Bakersfield. His idea involves a centering attachment for driving box boring mill.</p>	<p>Increased reclamation of war-vital zinc from used batteries, now S. P.'s only source of zinc, is made possible by idea of Wayne Ramsey, Reclamation and Welding Foreman at Sacramento General Stores. By Ramsey's method, adapting the hammermill, 400 pounds of zinc are produced daily against 100 pounds by former method.</p>
<p>To extract journal bearings more easily, E. P. Morgan, Electric Welder, Los Angeles Car Dept., devised this ingenious and specialized tool.</p>	<p>Ideas for improved production of brake shoes by C. Walls, of Sacramento Shops, save 156,000 pounds of critical metal yearly.</p>	<p>To keep passengers posted on dining car seats available, Conductor E. M. Benson suggested announcements over loudspeakers on Daylights.</p>	<p>Greater accuracy, with saving of time and effort, is made possible by jigs developed by S. P. Machinist Earl Eckenberg at Los Angeles Shops.</p>

**"and that includes Electrical Appliances!"**

*Reddy Kellowatt*

Give house thorough cleaning

Your faithful electrical appliances, too, deserve a careful cleaning and check-up—not just once or twice a year, but regularly! They will work better and last longer if you take proper care of them. Here are some suggestions:

<p>Defrost your refrigerator regularly. During defrosting, clean its interior with baking soda solution. Wipe up spilled food immediately. Don't leave water, grease or dirt on the door gasket.</p>	<p>Keep your toaster spotlessly clean. Wipe it with a damp cloth after it has cooled, removing stubborn discolorations with silver polish. Do not place any part of the toaster in water.</p>

CONSERVATION OF ELECTRICITY WILL HELP WIN THE WAR

**Spring Garden Program Plans For Arbor Day**

To stimulate interest in the new "spring gardens" program, a film entitled "Soldiers of the Soil" will be shown to Torrance High school pupils on Arbor Day, next Tuesday, by Harry Stone, agriculture teacher, in the Torrance High school auditorium.

The assembly will be pertinently presented as a part of the Conservation Week program, an annually observed occasion in American schools, and will laud agricultural efforts toward the winning of the war as well as those of American individuals who raised victory gardens last year.

The spring gardens campaign, to be introduced at T.H.S. during this assembly, is expected to be an even greater success than that of last year. Arbor Day and Conservation Week, emphasizing conservation of America's great natural resources in the past, will take on new and special meaning this year at Torrance with the spring gardens program heading the list, it was believed.
