**Sex Character Course Is Attracting Mothers**

The regular executive board meeting of Tenth District P.T.A. was held yesterday in the Los Angeles Chamber of Commerce Building, with Mrs. Edward T. Walker, president, presiding. The advisory committee, consisting of the 21 council presidents, met with the president.

With the increase in attendance mounting, parents are showing a definite interest in the sex character education classes taught by Mrs. Frances Bruce Strain and sponsored by Tenth District. The topic for the fourth class of the current series to be held May 2 in room 770 of the Chamber of Commerce Building will be "Home and School Adjustment Problems of High School Young People."

**Young Carrots Excel for Table Use and Canning**

Thin Carrots First When Finger Size, for a Dish of Supreme Flavor.

One of the big three Victory garden crops is the carrot, the other two being beans and tomatoes. Credit for the carrot's popularity is given to nutritionists, who have long praised it as the root crop richest in vitamins.

As a table delicacy the carrot ranks high only with home gardeners who know the supreme tenderness and flavor of young carrots as large as a little finger, pulled from the garden and cooked within an hour. Until you have eaten these, you do not know carrots.

These infant vegetables may be pulled up as a first thinning of the carrot row. Carrot seeds are small, and germinate slowly in twelve to eighteen days. Sow thinly, and mix a few radish seeds with the carrot, so the radishes may come up to mark the location of the row and assist in cultivating safely.

It's agitlin' 'bout that time when a body has ter think some on the bugs in the garden. Most folks are too busy ter give 'em as much attention as they should, but if'n ye work on 'em a leetle ye'll harvest more crops. Feller at the cow college says there's two kinds—them that drinks the sap outen the plant, and them that chaws on the leaves, and ye haffer treat 'em different.

The suckin' fellers are the plant lice, aphids; thrip, so dangd small ye can hardly see 'em; red spider, mighty small too; tomato rust mite; leathoppers and squash bugs. Ye git the pesky critters with a contact insecticide, like pyrethrum, rotenone, black leaf 40, and sulphur dust. That thar sulphur will knock the stuffin' outen red spiders and tomato rust mites. Watch out fer 'em on beans, tomatoes, peas and lots of other crops.

The chawin' bugs are different. Ye got ter git some stomach pizen onto the leaves fer them, so when the pest chaws the leaves, he'll git the pizen with it. Cucumber beetles, a leetle hard shelled feller with 12 black spots on his back; cabbage worms, cutworms, tomato pin worms; tomato horn worm (big as yer thumb) and a heap of others, will eat more leaves than ye can shake a stick at.

This here eryolite is purty good ter dust on the crops and ye can git it with other stuff in it, so ye kill both chawin' and suckin' bugs with one dustin'. But ye'll haffer dust often cause the critters keep right on hatchin' all summer. Now most people wash the crops well before eatin' 'em, but if'n ye got any pizen on 'em, ye must be especial careful, 'cause it'll make ye sick, if ye don't wash it off. Well, got a leetle plowin' ter do, so guess I'd better be a gittin'.

There would be no stop lights if corners were not dangerous!

**GARDEN GRAMS**

All preference rating requirements for purchase of Victory garden equipment, such as hand sprayers, hand dusters, wheel-type hand cultivators and hand plows were removed by the War Production Board in late March. In addition, manufacturers will be supplied raw material to fill immediate demands.

Dusting with insecticides, such as nicotine sulphate, calcium arsenate, eryolite and mixtures of the latter two with sulphur, are in many cases preferable to spraying. One reason is psychological—it's quicker, it's easier and, therefore, will be done more frequently! Another reason is that a cloud of dust blown by a duster will eddy to the undersides of leaves which will be missed unless the spraying job is done with unusual thoroughness.

Dusting by shaking a loosely woven cloth bag containing dust over plants is not very satisfactory but is better than nothing. Dust so shaken tends to fall vertically and does not reach undersides of leaves or stems, and mostly inests only as effective as thin applications and coverage of the plant is complete.

Soils are warming rapidly. In warm sections back from the coast, first plantings of sweet corn, string beans and a few early hills of cucumbers are justified. In cold low areas and towards the coast, particularly where soils are heavy, it is advisable to wait a few weeks even yet—until the first or tenth of May. Warm soil is essential for quick germination and good growth.

Aphis, which were not present in great numbers for some reason early in the spring, are appearing in large numbers now. Get after them with nicotine sulphate dust or spray and keep them under control.

The population of thrips will be increasing rapidly in blossoms and flower parts of weeds and ornamentals. Clean up the garden area and apply dusts to nearby ornamentals, as well as the garden to prevent migration to garden plants. Thrips will carry spotted wilt to your tomato and pepper plants from the weeds and ornamentals.

Green soybeans taste much like green limas—and a little more oil and starchy perhaps. Grant Green, Hokkaido and Edsley varieties have been found reasonably good under garden conditions—not commercial—for green beans. They shatter badly when ripe.

**HEN TURKEY SALES**  
In a move to obtain approximately 8,800,000 pounds of turkey for American overseas forces, the War Food Administration has restricted sales of hen turkeys in 16 states including California, Washington, Oregon and Utah.

**USE WATER USEFULLY**

WASTE AND EXTRAVAGANCE IN THE USE OF WATER IS SABOTAGE

WASTE OF WATER IS SABOTAGE STOP IT!

**TORRANCE MUNICIPAL WATER DISTRICT No. 1**

V—Use all the water you need for cleanliness and for health. Drink what you need. Use what you need for cooking. Use the water you need for bathing and in the laundry—but Don't waste it.

V—Use water on your lawn or your garden wisely. Don't water-log the ground. Better to irrigate it well as the rain would do, say once a week, than to sprinkle lightly every day.

X—Avoid wasteful habits, such as letting the faucet run while you do something else.

X—Don't accumulate piles of trash in the cellar or the attic or any other place around the home. That's a fire hazard and it takes water to put out fires.

X—Don't let water fixtures leak—whether it be a drip or a deluge.

**TO REMOVE TREES**

Advertisements for bids for removal of trees and stumps along Crenshaw Blvd. in the vicinity of Gardena and Torrance were ordered by the board of supervisors Tuesday, Supervisor Oscar Hauge reports. Bids will be received on May 23 at 10 a.m.
