

Women's Groups Seek WAC Names For Enlistment

Women's clubs and organizations throughout Southern California will be called upon by the newly organized Civilian Advisory committee, to campaign for names and addresses of potential enlistees into the Women's Army Corps and to educate the public to the need for more Wacs in the war effort.

Mrs. Herman Garretson, Pasadena, is contacting women from all parts of Southern California to aid recruitment of women, needed urgently by the Women's Army Corps.

"Our available men are gone, and it is up to the women of America to fight for the democracy they are enjoying by filling noncombatant jobs," was the theme of the stirring appeal.

More information will be obtained about WAC recruiting from the office of Captain Jennings, 610 S. Main st., Tucker 7171, Zone 14, Los Angeles.

Chairman

Herbert Brownell Jr. has been selected as chairman of the Republican National Committee, to succeed Harrison Spangler. Brownell will campaign for the Dewey-Brieker ticket and handle publicity for the nominee.

F. S. Carpenter Named Head of U. S. Rubber Here

Fred S. Carpenter, formerly factory manager of the Los Angeles tire plant of United States Rubber Company, has been appointed manager of the company's synthetic rubber plant in Torrance.

A. E. Jury, present manager of the synthetic plant, will return to the textile division as manager of new products. In addition to his former position as manager of the company's textile mills at Winstboro, S. C. M. A. Kirkland, production superintendent of Winstboro Mills, will remain in that capacity, reporting to Jury, who will make his headquarters both in Winstboro and New York.

Carpenter was born in Wethersfield, Conn., and is a graduate of Worcester Polytechnical Institute. His first position with United States Rubber Company was as an engineer in the general laboratories. During the first World War he became a captain in the Air Corps, stationed at McCook Field, Dayton, Ohio. Upon his return to the rubber company Mr. Carpenter was assigned to the Hartford Plant as supervisor of power, remaining there until 1928, when he was sent to the company's Far Eastern plantations.

In 1931 Carpenter came to Los Angeles to supervise the purchase of the company's tire plant. On completing that transaction, he remained as factory manager. Since 1941, he has been located at the company's main office in New York as general manager of the tire division and subsequently as administrative assistant.

Jury, a native of Malden, Mass., received an engineering education at Lowell Textile Institute and joined the United States Rubber Company as a textile expert in 1915. In 1917 he organized the company's textile development laboratory and in 1922 was appointed director of the general laboratories.

In 1928 Jury was made manager of Winstboro Mills, where he remained until 1943, when he was drafted by the synthetic rubber division to organize and operate the company's synthetic rubber plant here.

Transportation Corps

One of the most widely-traveled of all United States Army insignia today is that of the Transportation Corps of the

Army Service Forces. Created in March, 1942, the Transportation Corps is the youngest Corps in the Army.

Despite the youth of this important service, its appropriate insignia—winged car wheel flanged on a rail and charged on a shield, all within an eight-spoked wheel—is known in every Theater of Operations and on each of the seven seas.

The ship's wheel identifies the Transportation Corps as the operator of the world's largest "merchant" fleet—sometimes called the "Army's Navy."

The shield is representative of the familiar Federal Highway marker and indicates Transportation Corps' supervision of movement of Army personnel and material in this country by motor carriers.

The winged car wheel on a rail represents the Transportation Corps' famed Military Railway Service which today has troops on six continents.

The men who wear this insignia stand ready to meet and are able to cope with any transportation emergency.

Thatcher New Cubmaster of Waleria Pack

Waleria Cub Pack 240-C, sponsored by the Waleria PTA, announced that Cubmaster Roy Palmer had tendered his resignation due to his many other civic activities. The pack gave Palmer a loud resounding cheer and was happy that he consented to act on the committee.

Geo. P. Thatcher, assistant cubmaster, accepted the cubmaster's station and will endeavor to carry on.

Thatcher announced the formation of a cub baseball team for Waleria, which was accepted enthusiastically. Assisting in the formation of the team will be Carl Cobbs, former big league hardball player, Earl Gipe and Art Stagner.

Mrs. Helen Conner and Mrs. Joy Nohrs, new den mothers, were introduced to the pack, along with Jerry Adams and Jack Carter, new den chiefs.

Garden Grams

Food Preservation

Don't waste food! If you have a surplus, either give it to a neighbor or preserve it. All fruits except figs can be safely preserved at home without a pressure cooker. And tomatoes are a fruit. All vegetables, on the contrary, must be pressure cooked (ten pounds pressure, 240°) to be safe from the deadly botulism. If you have no pressure cooker, use one of the 11 community canneries in high schools and junior colleges throughout Los Angeles city and county, or call your chamber of commerce for information concerning ration point-free custom canning.

Tomatoes, Sweet Corn
If you do not have tomatoes planted or if those you put in early have developed disease and you wish to replant, early August is the deadline. Growth will be rapid during August and September and you should have fruit in October and then to frost. Be sure to clean up thoroughly before replanting. That means destroy all the old plants and do a thorough job on pests. We're right up against the end of the corn planting season, too! It will not pay to plant after the first week of August.

Peppers, Eggplants
They're both hot weather lovers. Cold weather is holding everything else back, so why not these, too? Keep them free of pests, give a side dressing of nitrate, and be sure moisture is adequate. That's all you can do—the rest is up to the weather man!

Summer Fertilization
The application of nitrate fertilizer in the summer will help all vegetables. Four and one-half cups of Victory Garden Special (containing 6 per cent nitrogen) to 100 feet of garden row one foot wide is a good application. Double the amount for two-foot wide rows, etc. Apply in a shallow trench about four inches from the roots or in the bottom of the irrigation furrow. Equivalent amounts are one cup sulphate of ammonia (20½ percent nitrogen) or 1½ cups nitrate of soda (16 per cent nitrogen).

Worms on Tomatoes
Repeated use of cryolite or calcium arsenate as a spray or either material as a dust mixed with sulphur will control tomato pinworm and the big horn worm. Note the words: "repeated use"—this means every two or three weeks.

A SERIOUS MESSAGE to Friends and Parents in TORRANCE and LOMITA

WE PLEDGE OBSERVANCE of these principles:

1. Not to knowingly serve alcoholic beverages to anyone under legal age.
2. To abide strictly by legal closing and opening hours.
3. To spread the principle and practice of moderation.
4. To maintain a clean, orderly place of business.
5. To meet with civil and military authorities at any time to achieve these ends.

There are some vital principles in which we believe, just as you do . . . for your youngsters as well as our own . . . for your sake as well as ours.

ONLY "DOPES" ARE JUVENILE DELINQUENTS!

It's the suckers with nothing to do evenings and easy money in their jeans who are out making fools of themselves trying to ACT "grownup." The fellow who really has a man's brain won't waste his time "painting the town." He is getting in some good hard licks that will pay off! Ten years from now the dopes will be begging him for a job!

Every business and professional man in this country . . . be he lawyer or banker, doctor or grocer . . . has an ethical standard for his business in which he believes and practices.

We, as cafe and tavern-keepers, also have a set of business principles by which we guide ourselves. The purpose of the principles is a simple one, but very important . . . to protect the welfare of our fellow citizens, old or young. That is why, first on this list of principles, we put our pledge never to serve knowingly, under any circumstances, anyone who is under the legal age of twenty-one.

As parents, we understand the full wisdom of this law . . . as good citizens, we intend to enforce it.

We believe, too, in the principle and practice of moderation. We will maintain our cafes and taverns as friendly, decent places where you may stop in at any time with the full assurance of enjoying yourself in quiet, respectable surroundings.

We believe, finally, in the soundness of legal opening and closing hours, strictly adhered to.

Without reservation, every one of us here undersigned subscribes to the above principles. Without reservation we will do all in our power to abide by them.

This, as your neighbors and fellow-businessmen, we feel is our obligation to all of you.
