LET'S HAVE FROSTING

Frosting on a cake is more than a "treat." It helps to keep the cake moist as well. For professional looking cake, apply frosting as follows: (1) Allow cake to cool and brush off loose crumbs. Spread frosting evenly and fairly thin over sides with spatula or knife. (2) Pile remainder on top, spreading lightly toward edges, leaving most of the frosting in the center. (3) Run spatula over sides again to fill in any spaces and to set frosting in place. (4) Let frosting "set" well before putting cake away or attempting to cut it.
