He told of results in disease prevention throughout the county over a period of years through inoculations, antitoxins and other medical treatment.

Science has made great progress in disease prevention and the County Health Service has made readily available to everyone the necessary prevention treatments. However, many persons have not used this privilege; consequently, in the present existence of wartime congestion, a dread epidemic could easily start with dire results.

"There's a telephone  
in the house where I am  
moving. Can you  
connect it for me?"

In normal times the answer would be: "Certainly! When would you like to have it done?"

We wish that we could give that answer today.

But there is a serious shortage of telephone facilities. Telephone factories and manpower have been producing a most entirely for war. Others, like you are waiting for telephone service. That telephone in the house you are moving to may be a ready "spoken for"—by somebody who has been waiting longer.

We are sorry that the shortage in telephones, central office equipment, outside wires and other facilities causes inconvenience to anyone. We will do our best to take care of as many orders as possible.

Thanks for understanding.
