Dr. Lisman Buys Hosking Residence

Dr. Phillip H. Lisman, optometrist, of Wilmington, is the new owner of the property at 1503 Post ave., which he purchased from Mr. and Mrs. Russell C. Hosking, and which was formerly

owned by Dr. and Mrs. J. S. Lancaster. Dr. Lisman and his family have taken possession of their new home. The business details were completed by Luther Mumford, real estate broker. Hosking is Santa Fe Railway agent here.

Smooth Sailing

A railroad's roadbed has a lot to do with travel comfort. A well-built roadbed does away with annoying, sleep-disturbing bumps... like a boat breasting a choppy sea. It gives you "smooth sailing."

The kind of gravel used for roadbed ballast is an important factor. Union Pacific uses a special, sturdy type of crushed granite which stands up particularly well under wartime's heavily loaded freight and passenger trains. Then, too, it acts as a "cushion," resulting in more comfortable riding and less wear on locomotives and cars.

Thus, even the ballast used on the railroad's roadbed plays its part in efficient, round-the-clock transportation of troops and essential battle-line freight over Union Pacific's Strategic Middle Route, uniting the East with the Pacific Coast.

Future "smooth sailing" over life's highway can be assured by holding tight to the war bonds we now have... and, as an extra measure of economic protection, buying as many more as we can possibly afford.
