Torrance VFW Commended For Membership Gain

Torrance Post No. 3251, Veterans of Foreign Wars, was highly complimented for its membership gains and work among veterans at the 4th District meeting held in Culver City on Sunday.

According to Commander C. Earl Connor, the membership of the post now is 350. When he became commander, the post membership was approximately 80.

Commander Connor, Mrs. Connor, who is president of the VFW auxiliary, and other members of the post attended the Culver City affair.

NO RETURNS
Superior Judge Clarence L. Kincaid of the Appellate Department of the Superior Court has handed down a decision holding that a tenant cannot recover money he spends voluntarily on his landlord's property.

Wide Interest Created By L.A. Turf Purchase Of Arrowhead

The prospect that Los Angeles Turf Club, Inc., will purchase Lake Arrowhead with its surrounding properties and improvements and operate it, along with the Santa Anita Park racing, as one of the largest sports centers and playgrounds in Southern California has created wide interest.

Executive Vice President Charles H. Strub has confirmed the announcement from the Lake Arrowhead Corp. that the Turf Club has been given a 90-day option to purchase. No price has been revealed, but it is reported several million dollars will be involved.

The deal would take in the 800-acre Arrowhead, Lake and 3200 acres of mountain land surrounding it. Improvements and facilities are the Lake Water Company, Lake Arrowhead Lodge, The Village Inn, North Shore Tavern, Lake Shore Cottages, Arrowhead Village with its shops, theatre and amusements.

Los Angeles Turf Club, Inc., has already made a start in employing engineers, architects and other specialists to develop plans for possible major improvements to the attractiveness of Lake Arrowhead. Examination of the title, check of the books and other routine procedures will be followed before the option expires on Jan. 26.

"Lake Arrowhead, if purchased by Los Angeles Turf Club, Inc., will be developed and operated as a high class sports and recreational area," declares Executive Vice President Charles H. Strub.

In the meantime, preparations are going forward at Santa Anita Park for its greatest winter racing season, Dec. 29-March 16, with the richest stakes in turf history scheduled.

This will be the second project, outside of racing, that has been undertaken successfully by Los Angeles Turf Club, Inc. During the war when Santa Anita Park was in the service of the U.S. Government, an industrial division was organized in the purchase of Gladen Products in Glendale. It engaged in 100 per cent war production, manufacturing precision hydraulic parts primarily for aircraft use. In 1943 it was awarded the Army and Navy "E" flag for outstanding performance in war production. Later a star was added for the continuance of the excellent record.

Filipino Girl Relates Tortures

Rosalinda Andoy, 11, raises her dress at the war criminal trial of Gen. Tomoyuka Yamashita in Manila to show the court some of the 38 bayonet wounds on her chest and body as she testifies for the prosecution. The youngster watched the Japs bayonet her father and mother to death. The prosecutor is Maj. Glicerio Opilano.

Millions Of Christmas Seals Are Now Being Delivered Here

More than 117,000,000 Christmas Seals, each of them a potential bullet in the fight against tuberculosis, are being delivered to homes and offices in the Los Angeles area beginning Monday, Nov. 19, it was announced today by Charles C. Reed, president of the Combined Christmas Seal Fund.

"Funds raised by the annual sale of Christmas Seals, finance the fight against tuberculosis and heart disease carried on throughout the year by the Los Angeles County Tuberculosis and Health Association," Reed said.

"Tuberculosis kills more persons between the ages of 15 and 45 than any other disease and the death rate in the city of Los Angeles is higher than that in the county area, the state of California or the United States," he pointed out.

"During the last twelve months the Los Angeles County Tuberculosis and Health Association provided free chest x-rays for 32,389 adults in this area. Almost 40,000 school children were given tuberculin tests by the Association in cooperation with the various school districts and Parent-Teacher Associations in the county, and 13 per cent of these reacted to the test, showing that the germs had entered their bodies," according to Reed.

In addition to the more than 4400 families reached by the Association's public nurses, almost 855,000 persons were reached with the facts about tuberculosis through talks, motion pictures and literature, he reported.

"These and other health protecting activities of the Association are financed entirely by the sale of Christmas Seals," Reed said. "No funds are obtained from tax sources, community chests or the Red Cross."

The official tuberculosis Christmas Seal bears a picture of a boy carrying a huge holly wreath and the familiar double-barred or Lorraine cross.

Torrance Legion Post Commended By Commander

V. S. Crossland, Post No. 170, American Legion, won the compliments of District Commander Richard Y. O'Shaughnessy at the commanders and adjutants dinner here last week.

James Brodie, commander of the Torrance post, was praised for his organization work.

The membership of the post now approaches 100, almost double what it was when Brodie took his term of office, it was said.

No matter what we have undergone and suffered, we must try to forgive those who injured us and remember only the lesson gained thereby.

Madame Chiang Kai-Shek

More Junior Gardeners Seek College Training

College campuses will draw an increased percentage of America's farm youth now that World War II has ended, according to the second annual survey just completed among boys and girls of the National Junior Vegetable Growers Association.

Seventy-four per cent of the 12 to 21-year-old vegetable growers in 46 states intend to pursue higher education at some state university or college, according to postcard questionnaire replies received by Prof. Grant B. Snyder of Massachusetts State College, association adult advisor. A year ago, 54 in every hundred expected to attend college.

Throughout the war years the average member consistently increased his or her contribution to home and market food supplies. Extra activities, the survey revealed, kept the average boy or girl well occupied, but each had time enough to compete in 1945 for the \$6,000 in scholarships offered by A. & P. Food Stores in the association's fifth annual production-marketing contest.

Townsend Club No. 1

By LOTTIE WADE
Torrance Townsend Club No. 1 will hold its regular meeting on Nov. 23 at 7:30 p.m. in the Men's Bible Class hall. There will be games with prizes for high scores. Also a door prize. The refreshments will be pumpkin pie and coffee. Dancing will fill the remainder of the evening. The home made ginger bread at the last meeting was greatly enjoyed by everyone.

Ensign Johnson Reports For New Naval Training

Ens. Harland Burton Johnson, 20, Torrance, has reported to Norfolk, Va., to train for duties aboard a destroyer or similar type vessel.

Ens. Johnson attended Torrance High School and the University of California. Son of Mr. and Mrs. A. W. Johnson, 1753 Arlington ave., he has a brother, D. E., 18, who is a seaman, first class, in the Navy.

1,000-YEAR LAMP POSSIBLE

The less brilliantly a lamp filament burns, the longer its life. It is theoretically possible to design and build an electric bulb which could burn continuously for 1,000 years. Engineers say they aren't interested, not because they won't be around to prove their claim, but that such a lamp, hardly brighter than a firefly, would be useless as an illuminant.

Wise Choice of Exercise Advised By Health Officer As Grid Season Ends

H. O. SWARTOUT, M.D., Dr. P.H., Los Angeles County Health Officer

Football has been one of the chief items of interest in all parts of our country for several weeks. College teams have been putting into practice the formations and plays they had worked out in places well screened from the prying eyes of prospective enemies, hoping to add to the element of surprise to those of strength, skill, and speed in the all-out effort to win. High school teams have been following their example in a slightly less strenuous way. Boys of all sorts and sizes have caught the spirit, and have been throwing, kicking, and catching footballs on playgrounds, side streets, and vacant lots.

But the season will soon be over, except for the various "bowl" games. When it is past, what will have happened? A few teams will have tasted the sweets of final victory. More teams will have gone down in defeat, but that will not mean they will be less likely to succeed in later life than will the men on the winning teams. There will be a few additional temporary heroes, and new lustre will have been added to the names of a few heroes of past years. Other heroes of the past will have joined the group about whom people say: "I wonder how he could have forgotten so much about football in so short a time."

There will have been hundreds of bruised bodies, several times as many stiff and sore muscles, quite a number of dislocated joints or broken limbs, and perhaps a few cracked skulls. Millions of people will have exhausted themselves hoarse while exercising their expensive privilege of sitting for hours on hard benches watching the teams play. Many of these spectators will have taken home a cold in the head or in the chest or in both, along with their feeling of elation or dejection, depending on which team won. Perhaps the ones who will have benefited most at the least risk will be benches watching the teams play, the grounds, the streets, and in the vacant lots.

These words surely seem queer to many of you who are reading them. But I must not

miss the opportunity which the season affords to emphasize once more that wisely chosen exercise will be aimed as nearly as possible at the physical benefit to ALL, rather than at the over-exertion of the few to provide a spectacle for the many. We may go through a glorious football season year after year for countless years and end up with as large a percentage of unnecessary physical defects among our youth as ever. If we must have football, let us have it; but how long will it be before we put ourselves seriously at the task of giving the bulk of our attention to the physical improvement of those who need it most?

Who among our bright lights in the field of physical education will take the lead in devising and promoting forms of exercise that will do the greatest good to the greatest number, instead of partly glorifying and partly overtaxing the few who are already giving the few who are our young people? Who among those who are parents will see to it that this principle is followed in the programs of their own children? It is the boy who needs the most help in improving his health. Are the home and the school giving him this help?

But the season will soon be over, except for the various "bowl" games. When it is past, what will have happened? A few teams will have tasted the sweets of final victory. More teams will have gone down in defeat, but that will not mean they will be less likely to succeed in later life than will the men on the winning teams. There will be a few additional temporary heroes, and new lustre will have been added to the names of a few heroes of past years.
