## Parking Meters Proving Failure In Other California Communities

Parking meters, would have yielded the City of Torrance a probable gross income of only \$1,248 during the first six months of this year had they been installed as proposed last fall.

This is the conclusion reached after study of conditions in similar sized cities which have in-

## U.S. Steel Co. Posts Earnings For 2nd Quarter

Reporting the earnings of United States Steel Corporation for the second quarter of 1947, Irving S. Olds, chairman, announced that the directors had today declared the quarterly dividend of \$1.75 per share on the preferred stock, payable Aug. 20, 1947, to stockholders of record as of Aug. 4, 1947, and a dividend of \$1.00 per share on the common stock, payable Sept. 10, 1947, to stockholders of record as of Aug. 8, 1947.

Income for the second quarter of 1947 amounted to \$29,336,868, as compared with \$39,234,511 for the first quarter, or a total income of \$68,571,379, for the first six months of 1947, all before declaration of dividends.

stalled meters during the past few years. Under the proposed arrangement, the Pacific Marble Co., from which 200 meters were ordered would have received 75 per cent of gross receipts until the meters, costing \$13,800, were paid for.

Observers point out that the theoretical revenue of \$1,248 would do little more than pay the salary of the man to maintain the meters and make collections.

Cities such as Pomona and El Centro have averaged only \$4.20 a month per meter and at this rate nearly two years would be required before the meters would have been paid for. Pomona, with a population of 24,000, purchased 750 meters in 1944 and El Centro, population 10,000, installed 300 meters in 1945.

Other figures taken from the 1947 edition of the Municipal Year Book reveal that 30 cities have found parking meters inadvisable and have had them removed. Included in the 30 cities are Bakersfield and Taft.

Recent action by the merchants Division of the Gardena Chamber of Commerce petitioning for the removal of meters there indicate that Gardena too is finding them impractical from the standpoint of convenience and revenue.

An ordinance passed October 15 of last year providing for installation of the meters was repealed later in the face of a merchants' inspired petition signed by 1100 Torrance residents. Opposition centered mainly about the fact that the meters were designed to raise revenue and were not needed to relieve congestion or increase parking facilities.

## New Legislation Aids Under-Age Calif. Servicemen

Ex-servicemen who are minors in the eyes of the law—under 21—may purchase real property on credit in California as a result of an act passed at the last session of the State Legislature.

The Senate bill authorizes guardians to purchase real property on behalf of their wards for cash, on credit or part cash, part credit.

This will allow many young veterans to take advantage of the loan clauses of the GI Bill of Rights.

The Federal act made no discrimination against the minors in granting loan privileges but an impediment lay in the state law which was interpreted by banks and other loan companies as indicating a credit contract with a minor might be voided. The general rule, heretofore under the California probate code was that a guardian could invest cash for his ward in real property, but inferred that such purchases could not be made for credit.

In 1945 the Legislature allowed war veterans over 18 to participate in the California veterans' Farm and Home Purchase act but this measure was specific in effect.

This year's legislation clears the way for a guardian to obtain GI federal loan benefits for his ward.
