Hard of Hearing Now Hear Clock Tick

A new device has been developed to give hope for the hard of hearing. Through the adoption of a new miniature electronic tube, science now brings restored hearing to the deafened.

No more cumbersome batteries or battery cords needed. No button in the ear. This new device weighs only a few ounces yet so powerful the hard of hearing may now hear whispers. The girls from the Senior troop were quite good cooks although all the girls took part and did their share of all the work.  
The only accident that approached seriousness was when my small son (Corny) accompanied us on a short hike and fell on the rocks. He bit through his lip and had to be taken to the doctor in Montrose over an hour's drive from camp. He recovered miraculously and returned right away to take part in all the activities.  
Lots of credit goes to the other two leaders who accompanied us, Mildred Arndt and Dorothy Johnson, who worked from early morning till late evening making the girls' stay more enjoyable. Thanks also to
