You can seldom put a price on a telephone call...but we do our best to make sure service is there when you need it.

THE SERVICE THAT NEVER SLEEPS

Round the clock, your telephone is one of today's best bargains

1. Keeping night patrol throughout the West, hundreds of telephone people are on duty to help meet emergencies and make sure your telephone will be ready to work for you when you want it. Many maintenance jobs are done at night while most telephone users are asleep. Lines are checked with electronic testers. Sensitive switching equipment is vacuum cleaned to help stop trouble before it starts.

2. In the quiet hours of the night, operators handle relatively few calls...but often they are unusually important. Repairmen are on call for service on important lines...doctors, hospitals and the like. Garagemen check and equip trucks for the next day's installation rounds. Building service workers make offices spic and span. All have an important part in keeping your service reliable.

PRICE INCREASES SINCE 1940 IN TERRITORY WE SERVE

FOOD UP 102%	CLOTHING UP 82%	COST OF LIVING UP 66%	AVERAGE TELEPHONE RATES UP 27%
--------------	-----------------	-----------------------	--------------------------------

3. Day or night, workday or holiday, your telephone remains one of your most valuable and useful servants. In spite of postwar inflation, telephone rates have gone up far less than our costs of providing service. On the average, rates have gone up less than half as much as the cost of living generally. A few pennies still buy a call...whether it be important or routine. Your telephone still gives you a big value for your budget dollar.
