Watch Your Summer Time Health

By DR. RAYMOND A. LARSON

Health Chats

IN SUMMER we make many adjustments in our living habits for the sake of comfort, safety, if at all, in hot weather. We use our wits to "beat" the severe summer heat. It is natural and fitting to do this. But our search for comfort should not be taken too far. Health is injured by things people do in order to be comfortable. Comfort and health should go together. But since our small comfort is at the expense of our health, we should be careful. From a health viewpoint, summer has its hazards as well as its benefits. To enjoy the benefits and to avoid the hazards we should profit by selecting the knowledge which comes from self-education which we must exercise for ourselves.

First, let us consider the important matter of food. On account of the heat the body's food requirements are different in summer. When the heat is consumed should be considerably less. Also the kind of food eaten in summer should be shallow water. Summer heat is a matter of individual choice. What appears to one person will not appear to another. Some kind of recreation, preferably in the open air and in the sun. For those who are easily overheated, a cool, shaded area is better. If everyone will eat intelligently avoid the hazards mentioned above, and follow some interesting, outdoor pastime to that makes you now are free from that staid, starchy, and increased consumption of salt.

HEALTH CHATS sponsored by R. A. Larson, M.D., Torrance, California, 18158 S. Crenshaw Ave., Torrance, Phone 2190.
