

# Sacramento Report

By CHARLES CHAPEL

Assemblyman, 40th District

The State Division of Beaches and Parks has determined that all of the proposed Playa del Rey Boat Harbor, sometimes called the "Marina of Playa del Rey," will be north of the village of Playa del Rey and entirely within the boundaries of the 61st Assembly District, which is represented by the Honorable Lester A. McMillan. Therefore, Assemblyman McMillan will be the author of most bills and resolutions pertaining to the Playa del Rey harbor and I shall be the first co-author.

During the current March session of the Legislature, McMillan and I will attempt to get an appropriation for the Playa del Rey harbor in the budget, but the odds against it are tremendous at this time. However, we believe that in the 1955 regular session we may be able to get some money out of the general fund, although our principal hope is that money for this purpose will come out of the tidelands oil revenue funds, when they are turned over to the State of California by the U. S. Government.

During April or May, the Joint Interim Committee on Marine Affairs in Bay Area Development will hold hearings in Los Angeles, giving special attention to the problems of Redondo Beach, Manhattan Beach, Hermosa Beach, and Playa del Rey. As stated before, this committee consists of five Senators and five Assemblymen. I am the only Member from Los Angeles County. Further information about the Committee's activities will be released later.

**Liquor Licenses**  
The readers of this column have written many letters to me regarding my comments on retail liquor licenses and they have convinced me that I am right in my contention that the raffle in liquor licenses in themselves should be prohibited by law. By this I mean that if the owner of either a cocktail bar or a package goods store wants to go out of business he should be able to sell the license with his business as part of the good will but not separately.

**Liquor Organizations**  
In a recent issue of this fam-

**BLOOD CONTENT**  
In one drop of blood the size of a pin head there are approximately five million red corpuscles and about 6000 white ones.

## New Treatment For Arthritis And Muscle Pain

TORRANCE - If you have been suffering for years from arthritis and muscle pain, do not despair. Dr. Larson's new application of the latest in scientific therapy is promising new hope for relief of the crippling torture of arthritis and rheumatic conditions. You are invited to come in for a complete examination to discover the true cause of your condition. Price for this examination is only \$3.00. Phone FAirfax 8-8738 before coming to offices of Dr. R. A. Larson, D. C., Ph. C., 1110 Sartori Avenue, Torrance (three doors north of Torrance Blvd.) -Adv.

My journal I said that the liquor people are not well organized, that only a small percentage of the businesses in each of the liquor trade organizations has paid its dues and shown any active interest, and that the lack of harmony among the liquor men themselves - makes it unlikely that they will be able to present their problems very completely or accurately during this current March session of the Legislature. Even the strict temperance leaders tell me that

this is a deplorable situation because it is not to the best interests of representative government for any large trade or industry to fight among its own members so bitterly that laws governing its activities are passed without complete hearings of evidence.

**Taxes**  
It is not possible during this current March session to enact my old Assembly Bill No. 5 which provided for an average reduction of all State taxes of about 5 per cent, but I shall introduce a similar bill during

the 1955 regular session. However, during this session I am actively opposing any increase in existing taxes or imposition of new forms of taxation.

One of the best sources of information about employment on a national basis is the record of steel production. At first glance this may appear peculiar but history shows that for many years the steel production has reflected the national economy. When steel production goes up, employment and general prosperity are climbing. When steel

production drops, the economic health of the country falls. Recently steel production has been on the upgrade, showing that on a national basis there is more employment now than there was a few months ago. Nevertheless, there are people out of work who are able employees. I am especially interested in this problem and welcome suggestions.
