

Downing and Fashion

It has oft been said that clothes make the woman . . . and certainly, this reporter would be the last to dispute this obvious statement. The art of being well-dressed can not only provide mildy with a well turned out look, it also contributes much to her charm and self-assurance. However, the mere knowledge of how to select and 'coordinate an ensem is not the only key to the door of the million-dollar look. It is equally important to be able to show the clothes to their best advantage. This can be achieved only on the woman who has learned the secrets of 'good carriage. We have all observed that many of today's top-flight models have conspicuously lacked a touch of Venus . . . but have more than made up for this deficiency by applying well that overworked word "flair" to their presentation. Check put own posture and carriage against the following rules:

BASIC RULES OF PERFECT CARRIAGE AND POSTURE: 1. Keep body in straight line, Arms should naturally fall directly at the side of the body.

- Reep body in straight line. All should having the directly at the side of the body.
 Chest out, tummy in. 'n hips tucked under.
 Head up, by all means. Avoid the unconscious habit of looking at the feet when you move.
 Maintain a pleasant expression on the face.
 Check to see if shoulders are even. Almost everyone has a tendency to carry one higher than the other. This alone can destroy the fine line of a garment.
 Replace a "lope" with a glide by applying the foremost secret of the fashion model. Move from the waist, not the shoulder. The upper torso should never earry the body.
 Step forward on a straightened leg. One that is bent only provides a bounce that is most unflattering.
 Place weight on ball of foot.
 Place one foot directly in front of the other.
