Council Asks LINK NEW FREEWAY, ARLINGTON

Torrance's City Fathers are studying the possibility of adding Arlington Ave. to the list of interchange points, when the San Diego Freeway is completed through north Torrance. Plans call for the freeway to run from West Los Angeles, angle through north Torrance to Compton, and then turn south through Orange County to San Diego.

Interchanges in this area are planned at Hawthorne Ave., Crenshaw Blvd., Western Ave., Normandie Ave., and Vermont Ave.

"Arlington Ave. is destined to become one of Torrance's major boulevards," Mayor Nicholas O. Draie said. "I certainly feel that the state should plan an interchange there." The route, formerly called the Sepulveda Freeway, is not expected to be completed before 1950 or 1960. The new name was given in accordance with a policy calling for the designation of the routes by their destinations.

Waller Expected Home Soon, Parents Learn

Robert James Waller, 22, son of Mr. and Mrs. Jess F. Waller, of 1820 Torrance Blvd., is expected home from Japan soon, his parents learned last week. A veteran of three years in the Navy, he will be hospitalized for some time due to injuries received in Japan.

West Basin Plan Will Take Effect Starting June 1

After two years of work, the West Basin Water agreement will go into effect on June 1, Rex B. Goodell Jr., chairman of the agreement committee announced Saturday.

The last step in perfecting the agreement, which will curtail underground pumping by water producers in this area, including Torrance, was passed Wednesday. Superior Court Judge Arnold Praeger approved the agreement.

The State Engineer will supervise the plan, which seeks to conserve water in this area to prevent the tables from falling so low that sea water will spoil the entire supply. Under the agreement, water pumping by the producers will be cut back to the amount used in 1949.

Bird Cracks Sound Wall in Record Trip

When this mourning dove headed south, it meant business.

It was shot Sept. 1 near Big Pine by John De Boef of Oxnard, and turned in to Warden A. F. Crocker of the California Department of Fish and Game. It had been banded by the Oregon State Game Commission only three days before, near Adrian, eastern Oregon.

This was a flight of almost 600 miles, even if the bird followed a bee-line course. De Boef's jet model had to make at least 168 miles a day.

Doves are generally considered to average about 25 miles per day on such migratory flights.
