

# Handy Jim's FIX-UP TIPS For the Home

## Use Preswood Bed-Board

When the doctor recommends a bed-board, get one from your lumber dealer. Ask him for a piece of Masonite 1/4" Tempered Preswood, a smooth hardboard that's splinter-free and easily kept clean.

The size is a few inches smaller than the bed spring. A bed-board fits between the spring and mattress and gives a firmness sometimes required in alleviating a back ailment.

Only simple preparation of the board is required. Round the edges slightly and bevel the edges of the smooth side lightly with a file or sandblock.

Tempered Preswood is a widely-used fix-up material. With the cutoffs from the bed-board, you can make a kitchen blackboard, for example, by covering the hardboard surface with a slating material available at paint stores. Whenever a strong, moisture-resistant panel is needed, try this material. It has no grain, no splinters, no knots. It may be sawed, planed, filed, nailed, screwed, glued or riveted. Experienced handymen say they always keep a supply of Masonite Tempered Preswood on hand.

## RUBBER SOURCE

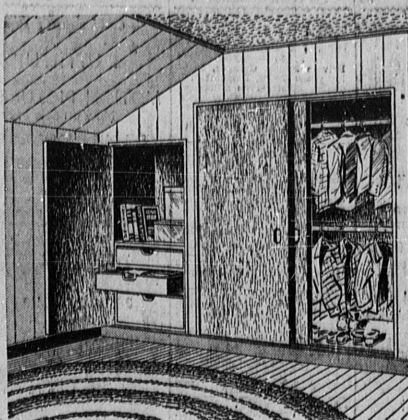

At one time, up to about 1900, Brazil produced and exported 99 per cent of all the world's rubber.

## WALL STORAGE . . .

Small bedrooms have a lot of getting cluttered up if too much furniture has to be put in. To get more floor space, go to the walls for storage, but make it count like these wardrobes, chest of drawers and bookcase, all hidden behind doors. These installations are easy to build with lumber like fir, which is flexible and can be molded with simple tools.

## DUAL DESK . . .

In most compact bedrooms, a writing desk is a luxury which space doesn't permit. How about this installation? A writing desk becomes a vanity dresser when the top is tipped back. Full mirror fits into underside and typewriter folds back into unit when not needed.
