What you see in this girl's ear is Sonotone's new hearing aid - complete. IT'S WORN ENTIRELY IN THE EAR - no cord, no extra "button." This smallest Sonotone ever weighs only half an ounce, including smallest battery used in hearing aid. Women, of course, cover everything with their hairdos. On men, this amazing hearing aid is barely noticeable from any angle. You just have to see this new transistor master-piece to believe it. Triumph of 25-year search by Sonotone engineers for hearing aid worn entirely in ear.
