

Garden Chatter

By LORING BIGELOW

This garden column has been written for you for one year now and in a column of this type it is often very difficult to determine whether it is popular, whether it is read, and whether it has been worthwhile to anyone.

In this column each week I have tried to keep my readers informed on the latest in items of interest for the garden, hints to make their efforts in the yard easier, and to bring the enjoyment of this greatest of hobbies to more.

Your comments on this column would be greatly appreciated no matter what their nature.

If there are items that you would like discussed in the future upon any gardening phase, this column would like to hear from you.

Suggestions upon the improvement of this space are also desired and will be carried out if possible.

Address your card or letter to Garden Chatter, in care of The Torrance Herald. All correspondence to this column will be confidential and merely act as a guide for future efforts. Please do not hesitate to write. Anything received will be greatly appreciated.

THE TORRANCE HERALD HOME AND GARDEN

HAPPY KINGDOM . . . Fantasyland, "happiest kingdom of them all" in Disneyland as shown in panorama. This view presents a perspective that includes in its sweep the striped cone-shaped roof of the King Arthur Carousel on the right and the turrets of Cinderella's dream castle on the far left. Center of the picture is dominated by the Pirate Ship Restaurant, at anchor in Pirates' Cove. Left

hand foreground shows the winding trackage and trestles of the Casey Junior Circus Train, while below, on the waters of the Storybook Land Canals, passengers see Walt Disney's creations come to life in scenes from popular stories of folklore. Visible in the right foreground are the cables and cars of the Disneyland Skyway, moving across the sky on their way to Tomorrowland.

LOMITA LIMELIGHT

Inoculation Program to Start Today at 259th Place School

By ALICE PALCZEWSKI DA 6-0788

During the Oct. 11 meeting of the 259th Place PTA, school nurse Mrs. Theodore Sulter announced that the inoculation program would begin today. Booster shots for diphtheria and tetanus will be given.

Also scheduled for Oct. 18 is the next association meeting to be held in the auditorium. Included in the pro-

gram will be a talk given by the Community Chest representative, Rev. Eldon J. Durham, pastor of the Lomita Presbyterian Church. A film will be shown and the fifth grade class will exhibit a class participation project.

The room mothers of the fifth grade will act as hostesses and be in charge of the refreshments.

During last week's meeting Mrs. O. J. Trujillo, room rep-

resentative chairman, explained the duties of the newly appointed room mothers and went on to say that well-informed room mothers could be the "core of parent teacher" in the individual association.

Mrs. H. B. McDonald, membership chairman, presented the facts and figures of the membership drive and urged all parents to join and be an active member in the PTA.

The Job's Daughters, Bethel 137, held their Fathers' Night on Friday. The fathers attended the Job's regular business meeting and sat beside their daughters throughout the evening.

The fathers were served refreshments and entertained by a solo from Shirley Washburn. A skit was presented by Carmen Gonzales, Diane Kennedy and Shirley Washburn. Each of the fathers were then presented with a comical toy gift. A father and daughter dance highlighted the evening.

Members of the Phi Sigma Phi sorority, Zeta chapter, attending the Founders' Day dance the 12th were Messrs. and Mmes. F. W. Trantham, R. W. Gerhart, J. W. Creager, Carl Opsal, and guests, and G. Rogers.

The dance, which was held

at the Club Alondra in Lawndale, commemorated the sorority's 27th anniversary and had the theme of Mardi Gras.

After the dance the Lomita members met in the Creager home for a buffet dinner.

A record turnout of 29 members attended the Job's Daughters' Mothers' Club, Bethel 137, on Oct. 11 in the home of Mrs. Alice Mince.

A satisfactory collection of "white elephants" were brought, and \$1.35 was collected by fining members who forget 10 cents.

Lenore Mackay was co-hostess for the evening and helped serve the refreshments.

Members have been asked to continue bringing their "white elephants" and old mylons to the meetings. The next meeting will be Nov. 14 at 8 p.m. in the home of Mrs. Audra Conner of 933 Gastine St., Torrance. Thelma Eastin will be co-hostess.

Sunday has been set aside by the Mothers' Club for the Senior Princess breakfast at the Masonic Temple in Lomita. Following the breakfast will be a toy party. The public is invited.

The Bruce Carlsons entertained Robert Carlson and family last Sunday. The two Carlson families spent the day talking and had dinner together. The children of both families spent the daytime romping and playing.

The "people of Union Carbide" include the men and women who operate the Torrance plant of Carbide and Carbon Chemicals Company.

It's there... but you can't see it

YOU NEVER SEE the element silicon in nature. Yet it's hidden everywhere—in sand, rocks, clays and soils, and even in smethyst and many other semiprecious stones. In fact, of all the elements, silicon is second only to oxygen in abundance.

Modern science has made silicon one of our most versatile and useful servants, but at the same time has followed nature's pattern of keeping it out of sight.

You can't see the silicon in metals, but steel is stronger and more uniform when it contains small amounts of silicon. Larger amounts of silicon are added to steel used in generators and transformers, and in motors that bring us the magic of electricity. Silicon adds to the usefulness of aluminum in many important applications.

For many years, the people of Union Carbide have been extracting silicon from its hiding places in nature for use in metal-making. And now they are working with silicon's exciting chemical offspring—silicones, used for everything from improved furniture polishes to new rubber-like products.
