A -lot of Torrance leaders are asking themselves "Why?" today.

Why—did the park and recreation bond issue fail to win a two thirds majority?

Why-did the airport issue go down to defeat? And well they might ask, "Where and how did we fail?"

Less than 30 per cent of the city's registered voters at to the polls last Tuesday . . . and those that did ed "No" enough times to squelch city hopes of additional parks and improvements of the airport.

The parks issue would have cost the taxpayers more ney. The airport issue would have cost local residents nothing.

Defeat of bond issues is not unique to Torrance alone.

It is a situation occuring all over the country. One economist recently cited the bond issue defeat trend which is extending all the way to the federal government where much pressure has been applied to trim the nation's budget.

Many believe the chief reason for the defeat of both a measures was that, primarily, the city did a poor job selling the issues to the public, Many of the voters didn't feel they were getting a hond me

If Fire Strikes

What would you do if your house burned down? There's a superficially easy answer to that question-you'd rebuild it with the insurance money.

However, unless you're one of a comparatively small minority of people, you'd be shocked to learn just how in-adequate your fire insurance coverage is.

The main reason that is true is explained by one little word—inflation. Sylvia Porter tells the story in one of her recent syndicated columns. A house that cost \$\$,000 in 1937 would cost \$21,600 to replace today. A house that cost \$12,000 as late as 1946 carries an \$18,300 price tag now. So it goes. Miss Porter quotes an authority on the subject as saying: "There's no doubt that the overwhelming percentage of America's tens of millions of homeowners are underinsured."

And that isn't the whole story. The same thing is true, and in many cases to an even greater degree, of the con-tents of our homes. We buy all manner of things over the years, and we just don't realize how much the total worth comes to. Then, on top of that, inflation has driven up the replacement cost of all commodities, just as it has driven up construction and repair costs.

This year fire losses will hit an all-time high, and may could help make up that grim statistic. Carefully inventory your possessions, then see your insurance agent and make sure your fire policies really meet your needs.

A free press is essential to political freedom and con-versely, governments which do not allow freedom cannot permit a free press. We had it figured about right last Sunday when we predicted that the bond and charter elections would be settled by a minority — not according to the old tradition that majority rules. A check of the voting fig-ties show that slightly more than 5000 persons out of a city population exceeding 90,000 voted yes to effect a major change in the city's form of government by add-ing two councilment to the city's governing body and having the mayor elected for a four-year term by the voters.
