Medical Education Week

It's often said that this country has gone overboard on "weeks" and "days" designed to call public attention to some institution or cause.

But there are outstanding and honorable exceptions to this rule. Medical Education Week-to be observed this year during the April 20-26 period-is one of them. It concerns something which has a direct bearing on the welfare and happiness of everyone and it deserves everyone's interest.

There are 83 approved medical schools in this country, and they constitute the foundation of our entire health and medical structure. Their primary job is to train able new doctors in increasing numbers. But, in addition, these schools carry on a wide range of other activities in the fields of teaching, research, service and leadership. Our fund of medical knowledge constantly grows, as does the complexity of our civilization. The work of the medical schools is all-important in pushing back the horizons of the medical sciences.

The financial phase of medical education is an important one. During the 1956-57 school, year, there were slightly more than 29,000 students enrolled in the 83 schools. The cost of operating the schools in that same year was more than \$200 million. Only a small part of the schools' operating budgets come from student tuition, which simply means they must look elsewhere for needed funds. Much support has come from two organizations - the American Medical Education Foundation, which is supported by physicians and medical organizations, and the National Fund for Medical Education, which draws its funds from industry and the Ford Foundation.

Opinions of Others

Every dog has his day, and without him, the American language would lose many colorful expressions. For instance: Let sleeping dogs lie . . . You can't teach an old dog new tricks . . . Doggone it . . . I'm sick as a dog . . . He's putting on the dog . . . It rained cats and dogs . . . I've been in the doghouse all week . . . Love me, love my dog . . . I've been leading a dog's life . . . I'm dog tired . . . You dirty dog . . . Barking dogs seldom bite . . . Dog tags . . . Dog-face . . . Dog cheap . . . Dog days-Mobridge (S.D.) Tribune.

The nation worked itself out of the Truman recession to enjoy years of unparalleled growth and prosperity withhelp from the politicians. It will work itself out of the Eisenhower recession unless certain selfish, shortsighted forces continue to force prices still higher and apply the brakes still harder on public buying.—Barnesville (Ohio) Enterprise.

Senator Knowland of California hasn't exactly taken himself out of the 1960 race for the Republican presidential nomination. But, according to the rules of the political trade union, he's made it tough on himself. He has declared that he likes the man who would be his chief opponent. He must know better than anyone that his kind remarks about Nixon will be tossed at his head like Herb Score's fast ball if he turns critical a year or two hence.-Elgin (Ill.) Courier-News.

The necessary expenses of government are very high. The essential costs of this country's survival and position of world leadership are great. But it's time to scrap the delusion that growing big government with its ever swelling spending and taxation can "prop" up anything.—Blairsville (Pa.) Dispatch.

Let Somebody Else Do The Babysitting

old-fashioned parent?
This may sound like the ranting of a fossilized thinker who always wants to go back to the good old days, but I'm of the school which be-lieves that something isn't necessarily bad because it's old nor necessarily good be-cause it's new. By the same token, ideas or customs aren't good because they're old, nor bad because they're new.

At any rate, we hear a lot about juvenile delinquency, lack of community recreation, schools and children's lack of learning, and suits being filed by parents because their children get hurt on selse's property. get hurt on somebody

There are too many parents who seem to feel that the care and upbringing of their children, outside of feeding and giving him a place to sleep, is the responsibility of the police, the city, the recreation denartment or the recreation department, or the schools.

They want somebody to babysit with Junior while they carry on their other activitles—working or playing. They have misinterpreted the theories of some "advanced" child psychologists who feel, that Junior shouldn't be too

What has happened to the id-fashioned parent?

This may sound like the anting of a fossilized think-thanking of a fossilized think-thanking of their responsibilities to the 'experts.

From what I've seen, read, and heard, it apears to me that what Daddy an Mommy do and say to Junior is far more important than what most policemen, recreation leaders, and school teachers say and do. It is at home that the child gets most of his attitudes about life in general. The schools and play-grounds fill in this picture, but they aren't any substitute for good home training.

Some children turn out well despite poor back-grounds, and some children grounds, and some children turn out poorly in spite of good backgrounds. (I don't mean money when I refer to "poor" and "good"). On the whole, however, the home is the mold that makes the child. child.

How can the school convince a child that honesty is the best policy when he hears Pop bragging about how he cheated on his income tax?

How can a recreation leader teach a child fair play when he hears Pop talking about how he "rooked" one of his associates.

How can schools interest a child in reading when Pop and Mom never do anything but watch television and show no interest in reading?

What makes me mad is the parent who brings children into the world and then lets everybody else take care of them. The only time this lazy parent gets disturbed is when his child gets hurt or compares badly with other children. Then he's the one who screams the loudest.
