

STUDENT STORE . . . Getting training in market check-out operations are students of the new South Bay Trade School at 16511 Hawthorne Blvd. in Lawndale. The school, a branch of Comp-Tech Trade School of Compton, was opened recently by Mrs. Ola "Sue" Sault.

South Bay Trade School Opens Doors in Lawndale

With a goal of providing proper training in all phases of market knowledge, procedures, systems, and advancement, Mrs. Ola "Sue" Sault has opened the South Bay Trade School at 16511 S. Hawthorne Blvd. in Lawndale.

An expansion of the Comp-Tech Trade School in Compton, the new school has been opened on a strict program and curriculum approved by the Retail Clerks Union and by the California Groceryman's Assn.

Students at the school receive specialized training in checking and weight computation, and courses to be added include meat wrapping, business machine operation, and retail estate.

Capacity enrollment at the

new school is 100. Students are taught the values of personal conduct and appearance along with the technical operations of the vocation.

Back grocery check-out stands and countless shelves lined with dummy cans, glass containers, boxes, cartons, and bags, each approximating the weight of the genuine item, are used. Prices are changed on the items just they are in stores, special items are run through on certain days, and the operation made as similar as possible to actual store conditions.

Two vital subjects, according to Mrs. Sault, are popular with the students: "Detecting Counterfeit Money" and "How to Prevent Shoplifting."

The school is open 9:30 a. m. to 9:30 p. m. Monday through Friday and until 4:30 p. m. on Saturday.

Foot Bridge For Alondra

Preliminary plans for the construction of a pedestrian bridge across Dominguez Channel at Alondra park were approved this week by the Board of Supervisors, and the County Engineer's office was instructed to prepare the work drawings.

The bridge will be constructed approximately 700 feet north of Redondo Beach Blvd., and will provide access to the picnic area of the park from the parking area of El Camino college.

To be constructed of a pre-stressed concrete slab, the bridge will be six feet wide between the hand rails, and it will be approximately 75 feet in length, according to Supervisor Kenneth Hahn.

The bridge and its supports which will be 20 feet in length is being designed to conform to future widening and improvement of Dominguez Channel. Plans for the widening of the channel through the park call for it to be increased to 75 feet with concrete sides and bottom.

Hahn pointed out that construction of the bridge will provide easy access to the park from the large El Camino college parking area, and will reduce traffic hazard and congestion at the park during the busy summer months.
