Parky was loaned to the scouts by Jerry Waack of the County Recreation and Parks Department. In Parky and friends Sally Atkinson, Barbara Regus, Jane Comstock, and Barbara Doran.

Harbor Savings and Loan Moves Into New Offices

Less than six months after opening its doors, Harbor Savings and Loan Assn. moved into its new \$100,000 building Tuesday President Joseph A. Wall said today.

To celebrate the event, the association is holding open house through July 10, when a drawing will be made for a Mexican burro and saddle for the children and a power lawn mower for the adults. Chances on the prizes are free to all visitors to the new building.

The new 1800 sq. ft. building is at 1813 S. Pacific Coast Hwy. behind the association's formerly occupied temporary office, which has been moved away. A heavy-duty frame structure, the new office is of exterior plaster and has an attractive brick and glass front.

Expansion Foreseen

"Future expansion of the building to 5400 sq. ft.," Wall said, "has been provided in the design."

During the first five months of operation, Wall pointed out, the association's total assets reached in excess of \$1,070,000.

"When the country's mortgage funds were the tightest," Wall said, "Harbor Savings pumped over \$500,000 in loans into the South Redondo area, and thus served hundreds of South Bay people."

The association's new building is part of a block long shopping development, with ample off-street, easy access parking areas at the front of all structures.

The spacious lobby is entered through the association's large glass and chrome front entrance door. Beyond the lobby is a customer's lounge which features brick planters with a profusion of tropical plants, marble table and Swedish modern sofa and armchairs.

HLW Background

The building has a forced-air circulatory system, with hi-

Highly music piped to all departments.

On the roof of the building a large unique electrically lighted sign alternately flashes the exact time of day and the correct temperature at 20 second intervals. The electronic brain controlling the sign is on display under glass in the customer's lounge.

The building's floor plan was arranged in consultation with savings associations operational experts. This was done to insure comfortable and convenient service to customer and efficient, economical operations for the association.

Machines Installed

A completed system of electronic accounting machines has been installed to insure rapid and accurate customer counter transactions. No transaction ever is handled manually.

The machines are installed so that association employees can show them, and explain their functions, to customers and visitors at any time.

L. A. School Children Get Beach Trip

Summer vacation was in full swing on June 28 when 365 children were taken by Los Angeles City School buses to Cabrillo Beach from the South Elementary District playgrounds.

Some of the playgrounds participating included the Halldale, 223rd St., 1828th St., Gardens, Denker, Lomita, Harbor City, 259th St., and several from San Pedro and Wilmington.

Besides being able to play, swim, wade, and dig, the children were shown life saving techniques, safety precautions, and given a tour of the Cabrillo Beach museum.

GARDENERS CHECKLIST

1. Shade trees help take theizzle out of summer. Fruitless mulberry, ash, elm, etc. are available now at your nursery in containers. These will give you a good start toward next year.
2. Be sure to pick up fruit that falls off your trees to avoid the fly problem.
3. Dahlia should be fastened to stakes now before the heavy flowers tend to break down the stalks. Feed at regular intervals.
4. Remember that plants and shrubs in containers need more frequent watering and feeding than those planted in the ground.
5. Keep after the aphid on your roses with spray or dust. Be sure to get under the foliage, too.
