RODEO TO HELP DECIDE WORLD'S CHAMPIONSHIP

Prize money won by contestants in the Torrance Rodeo here next week end will help decide the world's rodeo championships for 1959.

As one of the rodeos approved each year by the Rodeo Cowboys Assn., the Torrance event is a world's championship contest, open to the top contestants from the United States and Canada.

Each season the international titles are awarded by the point award system of the association, which credits each contestant with a point for every dollar won in competition at all approved rodeos. The cowboys with the most points in each event at the season's end are the champions.

The rodeo here will be in the sport's major league, conducted under nationally recognized rules that govern the competition at the nation's oldest and largest contests. It will be built around the five standard events of bareback bronc riding, calf roping, saddle bronc riding, steer wrestling and bull riding.

To tempt the top hands to try the broncs, bulls and steers, the rodeo has posted a purse of \$1000 or \$200 prize money in each standard event. The entry fees of the contestants, added to the purse, are expected this year to swell the total by another \$900. There will be a jackpot team roping event.

The rodeo will feature **Seven Measles Cases**

Deadly Nike Missile Put On Exhibit

The slim, trim and deadly Army Nike-Ajax air defense guided missile will be on display at the second annual "Ranchero Days" celebration, Colonel Charles A. Jenkins, commander of the 108th Air Defense Artillery Group, announced today.

The Nike missile display will be located at the new Torrance Civic Center. In addition to the missile, the 108th Group will also present a movie, "Nike: Guardian of the City," explaining the role of the Army's air defense units in protecting cities such as Torrance, Col. Jenkins said.

Protects Torrance

Providing the missile for display will be Battery D of the 855th Missile Battalion, the air defense unit located in Torrance, one of 16 such units of the 108th Group. Second Lieutenant Harrison J. Bradley, Nike launcher platoon leader of the Torrance battery, has been named officer in charge of the missile display.

Col. Jenkins stated that the display missile is the same type as those used by his command in the air defense of Los Angeles.

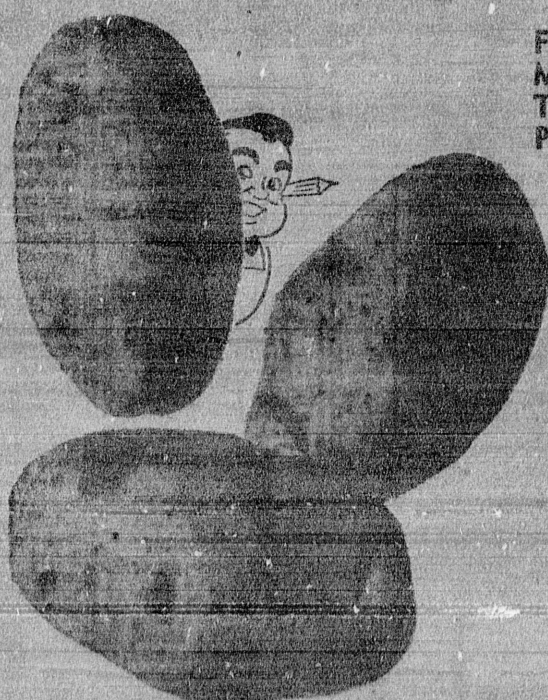

"This missile is capable of destroying any known aircraft," he said.

The Nike-Ajax is a liquid-fueled guided missile accelerated to supersonic speed by a solid propellant booster. It is capable of intercepting hostile aircraft far from the target area.
